AUDITORS' REPORT.

The Auditors for the year 1905 report that in compliance with the Public Statutes, they have examined the books and accounts of the Treasurer of the Town, Treasurer of the Water Loan and Sinking Fund Commissioners, Beals Park Fund and Treasurer of Tufts Library, and find proper vouchers filed for all payments made.

We have examined the securities and vouchers of the Trustees of the Fogg Library, James L. Bates, Reference Room at Fogg Library, Pratt School Fund, The Tufts Fund, and find the investments satisfactory.

We find that the Cash Book of the Town Treasurer, and the register of the Town Accountant agree as to the amount of orders paid, during the year, and also to balance of orders unpaid January 1st, 1906.

Balance of 1904 orders unpaid Jan. 1st, 1905	.	\$	6,193	33
Amount of orders drawn during year 1905	.		326,734	18
				<hr/>
			\$332,927	51
				<hr/>
Amount of orders paid by Treasurer for 1905	.	\$	325,992	93
Balance of orders unpaid Jan. 1st, 1906	.		6,934	58
				<hr/>
			\$332,927	51
				<hr/>

Respectfully submitted,

JOHN H. STETSON, *Treasurer.*

December 31, 1905.

We have examined the accounts of John H. Stetson, Treasurer of the High School Building Sinking Fund and the Elias S. Beals Park Fund, and have found them correct.

WALTER L. BATES,

JOHN P. HUNT,

CHARLES A. LOUD,

Auditors.

REPORT OF THE TOWN ACCOUNTANT.

Weymouth, Mass., Dec. 30, 1905.

To the Board of Selectmen and Overseers of the Poor :

GENTLEMEN :—The fourth annual report of the Accounting Department is herewith submitted, showing in detail the expenditures of the town during the past year.

Respectfully,

CHARLES B. CUSHING,
Town Accountant.

EXPENDITURES IN DETAIL FOR 1905.

CHARLES B. CUSHING,
Town Accountant.

REPORT OF SELECTMEN

The Selectmen of Weymouth hereby submit their Annual Report, together with the foregoing statement in detail by the Town Accountant of the expenditures under the several appropriations, for the year ending December 31, 1905.

HIGHWAYS.

Following the custom established by vote of the town in 1902, the Selectmen and Water Commissioners held a joint meeting on March 20 for the purpose of appointing a Superintendent of Streets and of Water, and a Town Accountant.

Ivers M. Lowe having filled the position of Superintendent acceptably for the last three years was re-appointed to the position and his salary fixed at \$1,700, of which \$950 was to be paid by the Selectmen and \$750 by the Water Board.

Charles B. Cushing was re-appointed Accountant at a salary of \$1,000, of which \$800 was to be paid by this Board and \$200 by the Water Board.

The Superintendent of Streets, in his report treats fully of the highway work, and for information in regard to the same we refer thereto.

The drainage of the portion of Broad Street, adjacent to the house and land of Dr. Chase, which was referred by action of the town, without instruction, to this Board, was considered early in the season. A careful estimate was made of the probable cost, and it was found that it would be about \$800. There is no doubt of the need of this work, but we did not feel justified in using so large a proportion of the highway repairs appropriation for this purpose, so the work remains undone. We have to report a further reduction in the amount received from the street railway corporation tax, by reason, in part of the decrease in value of the stock of the company, and in part, by the expensive power plant built in Quincy, the value of which is subject to local taxation as real estate and machinery in that city, reducing the amount

subject to corporation tax thereby. This tax was made a part of the highway repairs appropriation with the supposition that it would be practically the same as for last year, and its shrinkage by \$1,492.12 reduces the appropriation by that amount.

As the amount of the corporation tax cannot be known until December, it is unfortunate that we are obliged to carry it as a fixed amount if it is to be subject to such violent fluctuation.

REMOVAL OF SNOW.

The cost for removal of snow has been very materially less than the average of late years. There remains to this account a balance unexpended of \$2,651.33, which by present indications should be sufficient for the remainder of the winter.

At this writing it seems probable that the damage to the streets by the frequent freezing and thawing will more than offset the saving by the absence of snow.

NEW WORK.

PILGRIM ROAD.

Of the appropriation of \$200 for working Pilgrim road there remains unexpended a balance of \$9.04. A further appropriation of \$300 will be necessary to complete this work.

SAUNDERS STREET.

This street, which was reported to the town at the last annual meeting and accepted, has been worked for the appropriation of \$300 then made.

CHARD STREET WIDENING.

The widening of this street, as voted by the town, has been completed with a remaining balance of \$17.43.

SUMMIT STREET.

The work under the special appropriation for Summit street of \$302.15 has been performed at an expense exceeding the appropriation by \$25.37.

KEITH STREET.

The Keith street special appropriation of \$300 has been worked, leaving a balance of \$33.49.

COUNTY COMMISSIONERS RE-LOCATION ON BROAD STREET.

The report of the Selectmen for the year 1904 mentioned a decree of the County Commissioners by which a portion of the lines of Pleasant street and Broad street at Jackson square were re-located. The petition under which the Commissioners worked in making this change did not go beyond the northerly line of the Merchant property on Commercial street, and an abrupt ending was made at this point of about ten feet difference between the old and the new line. As the Commissioners did not wish to go beyond the scope of their petition to complete the job as they thought it should be, they recommended that a new petition be put in covering the front of the property of the Congregational Society. This Board forwarded such a petition, which was duly considered, and under date of October 17, 1905, a decree was received from the Commissioners extending the re-location along this front and awarding \$200 land damage to said Society, the same to be settled by the town, and a like amount to be paid the town by the county upon completion of the work. As a matter of convenience the working of these two decrees have been carried under one account. The work is completed and with the exception of the award to the heirs of R. V. Merchant, which has not yet been settled, the abutters have been paid as follows :

Mrs. Abbie J. Bicknell	\$264 76
Heirs of Prescott Lothrop	100 00
Old Colony Street Railway Company	10 00
First Congregational Society	200 00

For the working of the 1904 layout there was appropriated \$300.00. A further appropriation of \$247.30 will be necessary to defray the expense of working both layouts.

STATE HIGHWAY.

No new contract has been submitted by the Highway Commission for the further working of Main street.

Until just the standing of the account under the two previous contracts could be known we thought it not best to take the initiative in a new one. We have been able to secure some allowances above what were reported last year, which together with the work of the present year show the account to date, as follows :

Total cost to town	\$12,688 21
Received from State	10,499 81
Expended in excess of receipts . .	2,188 40

There was laid out for labor, material, tools, etc., before commencing work on the contracts 1,221.95. While this preliminary expense was necessary, we consider that not more than \$500. of it is properly chargeable to these two contracts, which would show a net loss of \$1,466.45. We are not satisfied with this showing and have endeavored to secure further concessions from the commissioners which we thought rightly our due, but without success.

We still think the contracts ought to have been worked without loss, and that this was not the case we feel was due to the management on the part of the Commission rather than that of the town.

STREET RAILWAY RELOCATION.

The section of street railway track upon Broad street, between Lincoln square and Webb street, has been in a condition not only objectionable, but dangerous to public travel, by reason of the nearness of the track to the trees and poles and by the condition of the road bed. After a hearing upon a petition for relocation of this section of track, it was ordered that the same be relaid, substantially two feet nearer the centre of the road, with girder rails, and the part of the road occupied by the track macadamized. The order called for the completion of the work by October 31.

The company objected strenuously to the girder rail provision, and, as it seemed to us, availed themselves of all opportunity for delay. After a hearing before the Railroad Commissioners the requirement as to rails was modified by making it a tee rail weighing not less than sixty pounds to the yard.

The company then claimed that it would be impossible for them to make the change before the ground was likely to be frozen up for the winter, by reason of the special work which would be required to be made for the curves, and asked for an extension of time to April 30, 1906. Though reluctant to have the work go over to another season, we at length conceded this request, and it now seems probable that this long-needed improvement will be made in the early Spring.

POLICE.

Thomas Fitzgerald was reappointed Chief of Police at a salary of \$800, and has performed the duties of the office in his usual unostentatious, but none the less faithful, manner.

His report, which is found elsewhere, will, we think, convince most people that our paid police force, while small, accomplishes a great deal of work and is deserving of the confidence and support of our citizens.

Patrick Butler was reappointed Inspector, and Arthur H. Pratt, John D. Walsh and Michael Allen, Night Patrol, constituting, with the Chief, the whole of our regular police force.

When the field of operations which they are required to cover is considered, it seems to us that their work has been done with commendable thoroughness. We think that in the observance of law and order the conditions which prevail in our town are much above the average of towns of like population, and for securing this result we are glad to give due credit to our police.

There is a growing need of better police protection in the north part of the town, manifested principally by disturbances created by persons under the influence of liquor, who come in on the street cars and by numerous breaks in the night time. We think that during the whole or a part of the coming year a night officer should be provided for this section, which would require an increase of the appropriation of \$500. Numerous complaints were received of the lawless speeding of automobiles on some of our streets, particularly on Bridge street, which is the main thoroughfare from Boston and surrounding cities and towns to Nantasket Beach. There is no way of securing a conviction in Court of these offenders without positive evidence of over-speeding by timing with stop-watches over a measured course. Our officers have done some good work in this line, but it looks, if life and limb are to be protected for the general travellers upon our streets, as though much more would need to be done the coming season.

PERAMBULATION OF TOWN LINES.

The perambulation of the town lines, which, by the law of the Commonwealth, is required to be made every five years by the Selectmen of contiguous towns, came on this year with all of our bordering towns, and was duly made. There are thirty-four

bound stones on our border, distributed as follows: Hingham 9, Rockland 3, Abington 6, Holbrook 7, Braintree 13, counting twice the stones where two of the bordering towns come together. These were all found and acknowledged to be in their proper places.

TOWN HOUSE.

The Town House has been visited by an inspector from the State Police Department, and the following minor changes ordered: The door at the rear of the house to swing outward, and the word "Exit," in 6-inch letters, placed over all doors of exit from the hall. This order has been complied with.

BILLS PAYABLE.

A Jefferson School House note of \$6,000, for which the money was raised by taxation, has been paid.

A Washington School House note of \$7,500 becomes due Jan. 1906. Coming upon the new calendar year this note was overlooked at the last annual meeting and no provision made for it. The treasurer will be able to take care of this note at maturity, but it will be necessary to raise the amount at the coming annual meeting. Another Washington School House note of like amount, becomes payable January 1, 1907.

We do not think it wise to raise money by taxation for both these notes in one year, and as no note of the town becomes due in the year 1908, we recommend that one of \$7,500, becoming payable Nov. 1, 1908, be issued to provide for payment of that maturing Jan. 1, 1907.

CENSUS.

We have received from the Bureau of Statistics of Labor the preliminary count for this town in the Decennial Census of 1905, by which it appears that the population of the town is 11,585; of which number 5,628 are males and 5,957 are females. This shows a gain of 259, compared with the U. S. census of the year 1900; or 294, compared with the State census of 1895.

GYPSY AND BROWN TAIL MOTHS.

By the provisions of Chapter 381, of the Acts of 1905, the gypsy and brown tail moths are declared public nuisances, and their suppression is authorized and required.

The same act specifies the procedure to be adopted in carrying on the work and the amounts which cities and towns are called upon to expend before they are entitled to help from the state. Our town, especially the north part, was found to be quite generally infested with both of these moths, and by the provision of the act and the requirement of the State Superintendent appointed thereunder the work was taken up in November, and notices sent to all owners of real estate in town. The receipt of one of these notices by a person did not necessarily mean that their property was infested, but it placed on them the duty of determining whether it was, and if so, of clearing them off. It also gave right to the town authorities to enter upon any land where the owners had failed to destroy the moths in the time specified, perform the work necessary, and collect from the owners for the cost of such work to the extent of one half of one per cent. of the value of the land.

The amount which this town is required to expend before it is entitled to relief from the state is, for the year 1906, \$2,826.15. We were in doubt as to the advisability of calling a meeting of the town for the purpose of providing for the cost of the work, but as the amount which was likely to be required for the calender year 1905 was not likely to much exceed the appropriation for the preservation of shade trees we decided not to do so. Dummer Sewell has been appointed local superintendent of the work, and has in connection with an agent of the State Superintendent made a general inspection of the town as far as the streets and the land immediately bordering them is concerned with the result before stated.

The work upon the streets in Ward One is well under way and as soon as practical after the first of January an increased number of men will be put on and the work pushed so as to have the nests destroyed before the insects' commence their destructive work in the spring.

The gypsy moth, when in large numbers, seems to feed upon absolutely every green thing. We have seen their work in the city of Medford, where hundreds of large pines were killed the last season by one defoliation. Deciduous trees are killed by being stripped twice, or at most three times.

The brown tail moths prefer pear or apple trees, but when in force they take about all trees except pine, white ash and hickory :

they are also extremely annoying by reason of an exasperating rash occasioned by their coming in contact with the skin. We trust our citizens generally will be sufficiently impressed with the seriousness of the situation to put forth every effort to destroy all of the pests found on their premises. The gypsy moth eggs are readily destroyed by the application of creosote mixture with a brush: they should in no case be scraped from the tree or other object where they may be laid, as they are very tenacious of life and are likely to hatch upon the ground. The nests of the brown tail moths, which contain the young, remaining dormant in them through the winter, should always be destroyed by fire, preferably in a stove or furnace. The nests of these resist heat to such a degree that the caterpillars have been found in some cases to come out in good working conditions where masses of them have been burned upon the ground.

The young of the brown tail moths are being destroyed to some extent in their winter nests by a fungus: how far nature is going to help us in this way cannot yet be known.

The work of suppressing these moths bids fair to be expensive, but it would be more expensive not to do so, as aside from the damage done by the insect a penalty of one hundred dollars a day is imposed by the law upon towns or cities neglecting or refusing to carry out the instructions of the State Superintendent.

BOARD OF HEALTH.

The town having declined at the last annual meeting to elect a board of health, the duties of that office again devolved upon the Selectmen: we have endeavored to fulfill them to the best of our ability.

CONTAGIOUS DISEASES.

The number of cases of contagious disease which have been reported are as follows:—

Diphtheria,	20
Scarlet Fever,	52
Typhoid Fever,	6

Though not numerous at any time, scattering cases of both diphtheria and scarlet fever have occurred through most months of the year. We would urge upon members of families where these diseases occurs that they exercise the greatest care in regard to

exposing others, especially by mingling in public gatherings and by riding upon the street cars : we are convinced that many cases are contracted in this way. It is of the greatest importance that light cases be guarded from the public with as great care as those where the disease assumes a more violent form, as the danger of infection may be as great in one as the other. A case of scarlet fever was discovered December 11 in a child who had been attending the Jefferson school through all stages of the disease but who had not been thought sick enough by the parents to be kept from school, they not knowing that he had scarlet fever. As it seemed probable that the whole school might have been exposed it was thought best to close the school for two weeks, which was done. Fortunately but two cases occurred which could have been contracted from this, but with the chance which seemed to exist of a general infection of the school we think the closing of it was a wise precaution.

The six cases of typhoid fever were in families where well water was used, and the supposition is that the water was the source through which the disease was contracted. In cases where water from wells still continues to be used for domestic purposes or for cows, we would urge the necessity of having sink drains, privy vaults and manure piles at a sufficient distance to prevent contamination.

TUBERCULOSIS.

This Board visited the recent tuberculosis exhibition given at the Horticultural Building, Boston, by the State Board of Health. The object of this exhibition was to disseminate knowledge concerning the ways in which the disease is likely to be contracted, and the best means of combatting its spread, including the care of patients.

While the statistics of the State Board show a marked decrease in the per centage of deaths of the population from this cause for the last ten years as compared with the first ten of the last half century ; attributable, it is claimed to a better knowledge of the manner in which the disease is spread and improved methods of treating it ; the fact remains that it still occasions the largest number of deaths of any malady the world over. Taking our own town for illustration, which shows a fair average for this state ; an examination of the reports of the last ten years shows

that one death in every eight is occasioned by tuberculosis. The investigations of recent years lead to the conclusion that the disease is to a large extent preventable, and in many instances curable, if taken in its early stages. The means upon which the most dependence is placed for eradicating it are the thorough disinfection of all clothing which has been used by the patient and the apartments occupied by them; but more important than all else, the destruction by fire of all sputum thrown off by them; this being the means by which the disease is communicated from one to another. The principal danger lies in the sputum becoming dried and raised into the air in the form of dust, in which it is in the most contagious condition and is communicated by inhaling into the lungs to the new victim.

It seems not to be asking too much; indeed, only the observing of ordinary precaution for self-preservation, to request and urge that in all cases where the disease occurs the foregoing precautions be heeded.

It is the hope and expectation of those who have devoted years to the study of tuberculosis that it will eventually be controlled to as great an extent as small-pox now is by vaccination. This end can, however, only be secured by the exercise of the utmost care on the part of the patients and those having them in charge.

NUISANCES.

About the usual number of complaints have been received concerning nuisances occasioned by privy vaults, sink drains, etc. As a rule we have found the owners ready to co-operate with the board when their attention was called to the matter, in abating such nuisances. We only repeat what has often been said when we say that there are parts of our town where the proper disposal of house drainage without a sewerage system seems almost impossible, the means employed to this end being unavoidably, but makeshifts. We wait with interest the report of the committee charged with investigating the sewerage question.

MALARIAL DISEASE.

We feel that we ought not to omit to mention somewhat fully a matter which has been before the boards of late years, as there is a possibility that it may, sooner or later, occasion considerable

outlay by the town. As far back as the year 1902, complaint was made to the board of that year, alleging the prevalence of malarial disease in the vicinity of Whitman's pond, by reason of the water being drawn down during the summer so as to expose the mud flats. Similar complaint was forwarded to the State Board of Health. The remedy sought by the complainants was the adoption of some means to prevent this drawing down of the water. This complaint has been renewed from time to time, and the State Board has made inquiries as to the number and location of cases of the disease in our town. They have also had the pond visited by their engineer, though his visits have not, as we are informed, been at times when the conditions were worst.

This pond is a beautiful sheet of water, when not more than two or three feet below high water mark, and adds much to the attractiveness of our town, and the keeping up of the water would undoubtedly be a most desirable thing to do; there is, however, no power conferred upon a board of health to enforce such a remedy.

The following opinion was prepared by the late Judge Humphrey, after a careful research of the whole matter in all its bearings, for the Board of the year 1902, and as it treats so completely of the whole problem we print it in full:

To the Selectmen of the Town of Weymouth:

I have examined the Statutes and various decisions of the Supreme Judicial Court of Massachusetts relating to the rights and duties of Municipal Boards of Health in abating public nuisances existing within the limits of their respective cities and towns, with especial reference to the powers granted to, and the duties imposed upon your Board, acting as the Board of Health for this town, in the case of the application of Wm. H. Mace and others for the abatement of an alleged nuisance on the western border of Whitman's Pond, resulting from the withdrawal or evaporation of its waters during the summer months, to such extent as to leave large surfaces of wet meadow or swamp land exposed to putrify in the hot rays of the sun for a term of many days, and sometimes of weeks, without alleviation from rains, or even from clouds, and thus causing unwholesome exhalations, which affect unfavorably the health of residents in the vicinity.

The powers and duties of Boards of Health are defined by Chap. 80 of the Public Statutes, as amended by numerous subsequent statutes; but those which relate to public nuisances are Chap. 338, of 1887; Chapters 108 and 193 of 1889; Chap. 460 of 1893 and Chap. 148 of 1899

The petitioners, in the case under consideration by your Board, suggest the restraining of the owners of the water power from using the water to such an extent as would uncover this swamp land, but I find nothing in the language of the statute, or in its construction by the Court to induce the belief that a Board of Health has any authority to issue such order, or any power to enforce it if it should issue it.

If, in the judgment of your Board, the existing conditions in Whitman's Pond constitute a public nuisance, seriously dangerous to the public health, you can, upon an application in legal form, notify the parties maintaining it, to abate the nuisance, but you have no power to prescribe the manner in which they shall do it. If these parties neglect to abate such nuisance within such reasonable time as you shall have named in your order, you may, if you deem it expedient, and are reasonably satisfied that the expense of abating such nuisance will not exceed two thousand dollars, proceed to do the necessary work at the cost of the town and collect that expense from the parties liable for its existence, provided that such parties shall not have seasonably appealed from your order to abate it, to the proper Court, in which case you must await the action of the Court.

If your judgment shall be that the abatement of the nuisance will cost more than two thousand dollars, you must postpone action until the town shall have made an appropriation sufficient to meet the estimated expense.

If upon petition, view and hearing you shall determine that the swampy lands which become exposed in summer by reason of the evaporation and drawing off of this pond at the points complained of, constitute a public nuisance, it will in my opinion, be your duty to consider whether like conditions exist in any other portions of the margin of the pond, and if any such are found, to include the estimated expense of their removal as a part of the cost of abating the nuisance complained of, and if such estimated cost shall exceed \$2,000, to defer action until the necessary appropriation is made. Otherwise, any nuisance resulting from

the same causes, could be divided into sections and the prohibition of the statute rendered ineffective.

Respectfully submitted,

JAMES HUMPHREY.

Weymouth, Aug. 22, 1900.

We also print in part a recent communication from the State Board of Health, by which it will be seen that they still have the matter under consideration.

“The condition of the pond when examined was much the same as when the previous examination was made in 1902. In most places the shores and bottom where exposed were clean and dry. In the westerly arm of the main pond bordering the easterly side of Middle street a considerable quantity of organic matter was exposed by the drawing down of the pond. While the condition of this arm of the pond appears to be one requiring improvement, the information submitted to the Board does not show that there has been a marked increase in the number of cases of malarial disease in the town recently, as compared with previous years, nor does this evidence show that malaria has been more prevalent in the neighborhood of the pond than in other sections of the town.

The Board would recommend that a careful record be kept in future of cases of malarial disease occurring in the town, and if it is found that sickness is caused by the condition of the pond when the water is drawn down, the necessary improvement should be made. It is probable that the objectionable condition in the part of the pond bordering Middle street could be removed by thorough ditching.”

The Suits at Law appear on another page.

JURY LIST.

The following list of Jurors is hereby submitted for the action of the town at its annual meeting to be held March 5, 1906.

NAME.	OCCUPATION.

REPORT OF OVERSEERS OF THE POOR.

ALMSHOUSE.

William T. Brown and wife severed their connection with the Alms house at the close of their year ending March 31, 1906, to accept a like position in the City of Brockton at a larger salary. We received nineteen applications for the position, from among which number we elected Joseph Cummings and wife as Superintendent and Matron, at a salary of \$800, the town to pay for needed help. Mr. and Mrs. Cummings having occupied the position formerly for a number of years to the acceptance of the town and being well known to the citizens generally, it seems hardly necessary to state that they have entered upon their duties with a determination to give satisfactory service. The whole number of inmates at the house for the whole or a portion of the year, not including boarders and those having no settlement in this town is forty-six, of whom thirty remain at the close of the year.

There have been three deaths, as follows :

Elizabeth Russell, 73 years of age, died February 19. Leroy S. Tirrell 63 years of age, died Sept. 11. George W. Hayden, 61 years of age, died Nov. 23.

The net cost for the maintenance of the house has been \$4,412.07. The cost per week for each inmate has been \$3.09.

There has been of late years an increase, more apparent than real, in the per capita cost, occasioned by the largely decreased number of tramps lodged, as while they are included in the total number of weeks their actual cost has been very much less than that of the inmates; especially is this true of the time before which labor was required of them, when the yearly number ran into the thousands. Under an act passed by the last Legislature, conferring power on the State Board of Health to establish regulations governing the lodging of tramps, such a regulation was issued requiring that where tramps are lodged at almshouses, it must be apart from inmates, that a bath be provided, and that night shirts be supplied for all. We thought that rather than comply with these requirements it was better to discontinue lodging them altogether, which was done.

No doubt the object of the law was to discourage tramping as a profession, and it is apparently having this effect.

POOR OUT OF HOUSE.

The whole number of individuals benefitted by outside aid, including those with a settlement here who had been aided elsewhere, has been 255 individuals in 135 families of one or more. Of this number, 37 individuals in 23 families had no settlement in Weymouth.

There has been no material change in the number of those receiving outside aid as compared with the previous year.

The cost of the town's poor out of the house has been \$8,820.64.

The whole cost for the town's poor has been \$13,282.71.

For those having a settlement in other places and state poor \$2,116.76.

One of the expenses of the department which it is found most difficult to keep within bounds is that of fuel. The expense of our town on this account is no doubt larger than the average of towns and cities in the state. In one city near Boston the outside poor are limited to one-fourth of a ton of coal every six weeks, from October first to April first. In a number of others the allowance is one-half ton in the same time.

In a general way it has been our purpose not to exceed three tons of coal and three cords of wood in a family for the year. This amount of fuel is more than many tax payers are able to secure for themselves. In a number of cases this has been exceeded.

We find it to be true in many instances where relief is required of the town, that the trouble is not so much that the applicant has not as much to do with as many persons who are self supporting, as it is a want of faculty to use wisely and economically the resources they have.

The following physicians were appointed to attend the town's poor for the year ending June 1, 1906, with the same duties and compensation as heretofore :

Ward One and Almshouse, W. A. Drake	\$100 00
Ward Two, John C. Fraser . . .	60 00
Ward Three, Granville W. Thompson .	50 00
Ward Four, Karl H. Granger . . .	40 00
Ward Five, Edward N. Mayberry . .	50 00

Chairman Selectmen, Weymouth.

REPORT OF INSPECTOR OF LIVE STOCK.

To the Honorable Board of Selectmen of the Town of Weymouth.

GENTLEMEN :

During the year ending January 1st, 1906, I have carefully visited all places where cattle are kept, and have not found any cases of tuberculosis.

There has been one case of glanders, and also a case of a dog with hydrophobia, which bit other dogs and also two good horses which are still in Quarantine.

I would suggest for the good of the townspeople that men having cows take more pains in the sanitary care of stables and other buildings where cattle are kept, as I find some of them wholly unfit for the healthy production of milk in their present condition.

Whole number of cows inspected	.	.	.	688
“ “ of young stock inspected	.	.	.	53
“ “ of bulls inspected	.	.	.	14
“ “ of oxen inspected	.	.	.	4
“ “ of sheep inspected	.	.	.	2
“ “ of goats inspected	.	.	.	13
“ “ of hogs inspected	.	.	.	610

F. WILBUR LOUD,
Inspector of Live Stock.

REPORT OF INSPECTOR OF LICENSED SLAUGHTER HOUSES.

January 20, 1906.

To the Honorable Board of Selectmen, Town of Weymouth:

GENTLEMEN :—I herewith submit my report for the year ending December 31, 1905.

I have called when notified on all licensed slaughter houses and have inspected all animals killed. I have to report all places as being kept clean as possible and all refuse is disposed of properly.

Number inspected : calves, 71 ; cattle, 8 ; swine, 408.

Respectfully submitted,

GEORGE B. BAILEY,
Inspector.

TAX COLLECTORS REPORT.

EAST WEYMOUTH, JAN. 1, 1906.

To the Honorable Board of Selectmen of the Town of Weymouth :

Herein you will find my report of taxes and interest collected for the years 1902, 1903, 1904 and 1905. Ending Dec. 31, 1905 and paid over to J. H. Stetson, Town Treasurer :

1902 Taxes due unpaid Jan. 1, 1905	.	\$198	64	
Tax Collected to Dec. 31, 1905	.			\$198 64
Interest collected	.			8 78
1903 Taxes due unpaid Jan. 1 1905	.	16,016	66	
Tax collected to Dec. 31, 1905	.			15,746 92
Interest collected	.			1,553 68
Bal. uncollected Jan. 1, 1906	.	269	74	
1904 Taxes due unpaid Jan. 1905	.	43,319	48	
Tax collected to Dec. 31, 1905	.			29,582 24
Interest collected	.			1,016 39
Bal. uncollected Jan. 1, 1906	.	13,737	24	
1905 commitment	.	165,407	32	
Taxes collected to Dec. 31, 1905	.			120,044 54
Interest collected	.			70 67
Bal. uncollected Jan. 1, 1906	.	45,362	78	
Total of Taxes and interest collected				\$168,221 86

Respectfully Submitted,
W. J. DUNBAR, *Collector of Taxes.*

 Paid fine of \$5.00 each, 12.
 Paid fine of \$10.00 each, 2.
 Paid fine of \$15.00, 1.
 Committed to the State Farm, 21.
 Committed to the House of Correction for 1 month, 10.
 Fined \$15.00, committed to the House of Correction, 3.
 Fined \$5.00, committed to the House of Correction, 3.
 Fined \$10.00, committed to the House of Correction, 1.
 Paid costs, 2.
 Defaulted, 2.
 Placed on file, 10.
 Continued, 4.
 Released, 25.
 Sent to the State Farm (appealed) 1.
 Amount of fines in Lower Court for drunkenness, \$161.00.

DISTURBING THE PEACE :

Paid fine of \$20.00 each, 2.
 Paid fine of \$15.00 each, 2.
 Paid fine of \$10.00 each, 3.
 Paid fine of \$5.00, 1.
 Paid fine of \$3.00 each, 5.
 Paid fine of \$2.00 each, 2.
 Discharged, 1.
 Amount of fines in Lower Court for disturbing peace, \$124.00.

UNLAWFUL KEEPING AND EXPOSING INTOXICATING LIQUOR :

Paid fine of \$50.00 each, 5.

Paid fine of \$50.00 in Superior Court, 1.
Discharged, 1.

LIQUOR NUISANCE :

Paid fine of \$50.00 each, 2.
Amount of fines in Lower Court, \$350.00.
Amount of fines in Superior Court, \$50.00.
Total amount of fines for liquor cases, \$400.00.

MALICIOUS MISCHIEF :

Paid fine of \$5.00, 1.

VIOLATION OF THE TOWN BY-LAWS :

Paid fine of \$3.00, 1.
Paid fine of \$2.00 each, 2.
Paid costs, 4.

VIOLATION FISH AND GAME LAW :

Paid fine of \$1.00, 1.
Fined \$30.00 each, (committed) 4.

VAGRANT :

Placed on file, 1.

INSANE :

Committed to Westboro, 2.
Committed to Taunton, 2.

STATE PAUPER :

Committed to Tewsbury, 1.

ASSAULTS :

Paid fine of \$25.00 each, 3.
Paid fine of 15.00, 1.
Paid fine of 5.00 each, 6.
Paid fine of 1.00, 1.
Committed to House of Correction for 3 months, 2.
Placed on file, 3.
Gave bonds to keep the peace, 1.
Committed to the House of Correction for 1 month, 1.
Fined \$15.00, (committed) 1.
Fined \$5.00, (committed) 1.
Continued, 1.

THREATENING ASSAULT :

Fined \$5.00, gave bonds to keep the peace 3 months, 1.

Paid costs, 2.

Placed on file, 2.

ASSAULT WITH A DANGEROUS WEAPON :

Pending in the Superior Court, 4.

Discharged, 1.

Paid fine of \$50.00 in Superior Court, 1.

STUBBORN CHILD :

Committed to Lyman School, Westboro, 1.

NEGLECTED CHILDREN :

Committed to the State Board of Charity, 3.

Continued, 2.

BASTARDY :

Continued, 1.

ADULTERY :

Committed for 18 months in House of Correction, 1.

Committed for 1 year in House of Correction, 1.

Committed to Sherborn, 1.

On probation, 1.

BIGAMY :

Committed to the House of Correction for $2\frac{1}{2}$ years, 1.

NON-SUPPORT :

Continued, 1.

On file, 1.

LARCENY :

Paid fine of \$5.00 each, 4.

Committed to the House of Correction for 3 months, 2.

Committed to the State Board of Charity, 1.

Defaulted, 1.

On file, 2

On probation, 2.

BREAKING AND ENTERING IN THE NIGHT TIME..

Committed to the House of Correction for 4 years, 1.

Sent to the Reformatory, 1.

Not guilty, 1.

Discharged for want of prosecution, 1.

Tresspass of fowl. Paid costs, 1.

Keeping a disorderly house; committed to House of Correction, 6 months, 1.

EXCEEDING SPEED LIMIT WITH AUTOMOBILE.

Paid fine of \$15.00, 1.

Paid fine of \$10.00 each, 8.

Paid fine of \$5.00 each, 20.

Discharged, 2.

On file, 1.

Amount of fines \$195.00.

Held as a witness; discharged, 1.

Eavesdropping fined \$3.00, ordered to give bonds to keep the peace, (appealed) 1.

UNLAWFUL GAMING.

Paid fine of \$3.00 each, 3.

Fined \$3.00, committed, 1.

Truant, continued, 1.

Deserter, sent to the Navy Yard, 1.

Arrested for out of town officers, 7.

Search warrants for intoxicating liquor, 34.

Search for stolen goods, 3.

Amount of property recovered of value, \$530.00.

Amount of fines in Lower Court, \$993.00.

Amount of fines in Superior Court, \$100.00.

The records show the usual variety of law-breaking, and, while it is practically in the same line from year to year, yet it increases as time goes by and the general work is also increasing in different calls and demands coming to our notice, most of which do not appear as a matter of record. The arrests for the year show a total of 274, an increase of 62 over last year. The most important arrests of the year was that of Osmond Korpstyne, with several aliases, and George W. Scott, who were with a gang of burglars with headquarters at Boston. They confessed to 7 breaks in Weymouth. Korpstyne was sentenced to a term of 4

years in the House of Correction and Scott was sent to the Reformatory. They had 3 other accomplices, two of whom were women, and all were sent to jail. They had been breaking in at Randolph, Lynn and Beverly, and had stolen several hundred dollars' worth of goods, most of which we recovered. The police did excellent work in breaking up this gang.

Our police force is a small one, consisting of 5 regular men, and when we consider the service required of them and the large territory covered I think they are doing well in the enforcement of the laws. In regard to the liquor laws, few people understand the difficulty the police have to obtain a conviction. You can convict one of a capital offense with less evidence than you can for the violation of the liquor law. It has been my experience that the people who are loudest in their criticism, and who know so much outside a court room, when summoned to Court know nothing of the case. They at heart do not want to see the law enforced.

I am pleased to state that the relations existing between the members of the force are harmonious, and they have shown a cheerful response to the many calls for duty during the year.

Respectfully submitted,

THOMAS FITZGERALD,
Chief of Police.

REPORT OF COMMITTEE TO INSTALL STORAGE BATTERY PLANT.

To the Honorable Board of Selectmen :

GENTLEMEN :—At the last Annual Town Meeting, the town voted to raise and appropriate the sum of \$1,300 for a Storage Battery Plant to be installed in the Engine House of Ward 2, East Weymouth, taking the place of the Old Gravity Battery Plant in the basement of the Jefferson School Building, East Weymouth ; and a Committee was appointed to carry same into effect.

The Committee having attended to their duty, beg leave to make the following report :

The contract for a storage battery complete, and a slate switchboard with all the modern improvements, was placed with A. D. Wheeler, the New England Agent of the Gamewell Fire Alarm Co., for		\$1,000 00
Paid to Waldo Turner for partioning off battery room in Engine House, Ward 2		184 37
Paid to Walworth Mfg. Co. for piping and fittings for heating battery room		12 20
Paid to F. P. Anthony for coil in stove for heating same		5 00
Paid to M. C. Dizer & Co. for pipe		75
Paid to F. M. Fearing for 615 ft. C.L. cable		92 50
Paid to Pettingell-Andrews Co., for fittings		2 85
Paid to Drew's Express		50
Paid to Cushing's Express		1 00
		<hr/> \$1,299 17 <hr/>
Amount appropriated		\$1,300 00
Amount expended		1,299 17
Balance		<hr/> \$ 83 <hr/>

This plant was installed under the supervision of Mr. H. L. Humphrey, Superintendent of Fire Alarm, and is now in first-class working condition.

Respectfully submitted,

WM. O. COLLYER, *Chief*,
WALTER W. PRATT, *Clerk*,
E. E. ORR,
J. R. WALSH,
D. W. HART,
H. L. HUMPHREY.

REPORT OF THE ENGINEERS OF THE FIRE DEPARTMENT.

To the Honorable Board of Selectmen :

GENTLEMEN :—I respectfully submit the following as the report of the Board of Engineers of the W. F. Dept. for the year ending Dec. 31st., 1905.

The organization of the Department consists of Board of Engineers ; W. O. Collper, Chief ; W. W. Pratt, Clerk ; J. R. Walsh, D. W. Hart and E. E. Orr ; Supt. Fire Alarm Henri L. Humphrey and of 166 officers and men connected with the different pieces of apparatus.

The apparatus consists of 7 Hose Wagons, 4 H. & Ladder Trucks, 2 Steamers and 1 Chemical.

Hose Wagons Nos. 3, 4, 5 have been painted and varnished during the year. The several pieces of apparatus in Ward 2 are badly in need of painting and we would recommend the painting of as many of them as possible this year.

Also H. & L. Nos. 3 and 5 are begining to show the need of varnish.

HOUSES.

The Houses of Hose 1, in Ward 1, Wards 2-3, have been painted this year, and now all are in good repair in town except Hose 7 house of Ward 1, which needs painting badly, and we recommend that it be done this year.

HOSE.

As we have been fortunate in not losing any hose during the year we have thought best not to recommend the purchase of more the coming year.

FIRE ALARM.

There have been 45 box alarms this year. Ward one has had 7 ; Ward two, 14 ; Ward three, 5 ; Ward four, 10 ; Ward five, 9 ; and a number of still alarms for grass fires.

The line has been rebuilt from Bradley's works to Bridge street, and the wire changed to about 35 new poles on Middle street.

The Electric Light Co. have replaced a lot of old poles in the different wards and changed the fire alarm wires to them.

Some of the wire is getting very rusty and I would suggest that, where a number of poles are renewed, new wire be used.

A room has been partitioned off from the hall at the engine house, and the headquarters of the fire alarm moved from the Jefferson school building to it, and a storage battery system installed there in place of the gravity. The cost of maintaining the gravity battery have been between \$250.00 and \$300.00 a year, and the life of the storage should be from 4 to 5 years without change, making quite a saving each year besides being much more reliable.

FIRE LOSS :

Value of property at risk	\$30,000 00
Actual loss of property	12,324 00
Value of contents at risk	11,520 00
Loss of contents.	3,671 30

RECOMMENDATIONS :

Salaries of Firemen, Engineers, Stewards and Superintendent of Fire Alarm	\$2,465 00
Fires and Expenses of Houses	1,800 00
Taxes of Firemen	340 00
Pay of Firemen at 30 cts. per hour	700 00
Fire Alarm	500 00
						<hr/>
						\$5,805 00

In conclusion I take this opportunity of thanking the members of the Department for their active and willing response in the discharge of their several duties. I desire to extend my thanks to your Honorable Board for the interest which you have taken in the Department.

W. O. COLLYER,
Chief.

ASSESSORS' REPORT.

The undersigned Assessors of the Town of Weymouth herewith present a statement of their work for the year ending December 31, 1905.

We have assessed upon the polls and estates of all persons and corporations liable to taxation in the sum of \$165,407.32, and have committed the same to Willard J. Dunbar, Esq., the duly-elected Collector of Taxes, with our warrant in due form of law, for collection and payment in accordance with the vote of the town, viz. :

[illegible]

TOWN CLERK'S REPORT.

ANNUAL TOWN MEETING.

COMMONWEALTH OF MASSACHUSETTS.

NORFOLK, ss. *To the Constables of the Town of Weymouth, in said County.* GREETING :

In the name of the Commonwealth of Massachusetts you are hereby required to notify and warn the inhabitants of Weymouth aforesaid, qualified to vote in elections therein, to meet at the polling places in their respective voting precincts, to wit : In precincts numbered One, Three, Five and Six, in the halls of the Fire Engine Houses located in those precincts respectively : in precinct numbered Two at Odd Fellows' Opera House, and in precinct numbered Four at the Hose House at Nash's Corner, on Monday, the sixth day of March next, at six o'clock in the forenoon, then and there to bring in to the wardens of their several precincts their votes on one ballot for the following named town officers, to wit : Town Clerk, Town Treasurer, five Selectmen, five Overseers of the Poor, five Assessors, Collector of Taxes, three Auditors, two School Committee for three years, one Park Commissioner for three years, three Trustees of Tufts Library for three years, one Water Commissioner for three years, one Commissioner for the Sinking Fund of the High School Loan Bonds for three years, one Tree Warden for one year and ten Constables, and also to vote on the same ballot " Yes " or " No " upon the question " Shall licenses be granted for the sale of intoxicating liquors in this town ? "

The polls will be opened at six o'clock in the forenoon, and may be closed at one o'clock in the afternoon.

You are further required to notify and warn said inhabitants, qualified to vote as aforesaid, to meet at the Town Hall on Monday, the thirteenth day of March next, at nine o'clock in the forenoon, then and there to act on the following articles, namely :

Article 1. To choose a moderator for said meeting.

Art. 2. To choose all necessary town officers other than those elected by ballot, viz: Public Weighers, Surveyors of Wood, Lumber and Bark, two or more Fence Viewers, two or more Field Drivers and one Pound Keeper.

Art. 3. To hear and act upon the report of the several boards of town officers and of any committees appointed at any former meetings, and to choose any committees the town may think proper.

Art. 4. To see what sum of money the town will vote to raise and appropriate for the support of public schoole.

Art. 5. To see what sum of money the town will vote to raise and appropriate for the transportation of pupils to and from school.

Art. 6. To see what sum of money the town will vote to raise and appropriate for the repair of highways, townways and bridges, and for the removal of snow.

Art. 7. To see what sum of money the town will vote to raise and appropriate for the support of the poor.

Art. 8. To see what sum of money the town will vote to raise and appropriate for the relief of disabled soldiers and seamen, and the families of disabled soldiers and seamen, under Chapter 79 of the Revised Laws.

Art. 9. To see what sum of money the town will vote to appropriate for the payment of State and Military Aid and for burial under the provisions of Chapter 79 of the Revised Laws, and to determine how much of the same shall be raised by taxation.

Art. 10. To see what sum of money the town will vote to raise and appropriate for the support of the fire department.

Art. 11. To see what sum of money the town will vote to raise and appropriate for police service.

Art. 12. To see what sum of money the town will vote to raise and appropriate for Tufts Library.

Art. 13. To see what sum of money the town will vote to raise and appropriate for the maintenance of a public reading room in the Fogg Library.

Art. 14. To see what sum of money the town will vote to raise and appropriate for the abatement and remittance of taxes.

Art. 15. To see what sum of money the town will vote to raise and appropriate for the payment of interest that may become due the ensuing year.

Art. 16. To see what sum of money the town will vote to raise and appropriate for printing and advertising.

Art. 17. To see what sum of money the town will vote to raise and appropriate for miscellaneous expenses.

Art. 18. To see what sum of money the town will vote to raise and appropriate for the payment of town officers.

Art. 19. To see what sum of money the town will vote to raise and appropriate for election expenses.

Art. 20. To see what sum of money the town will vote to raise and appropriate for Memorial Day.

Art. 21. To see what sum of money the town will vote to raise and appropriate for the rent and care of town offices.

Art. 22. To see if the town will vote to appropriate from the revenue of the water works for the current year the sum of \$27,640 to be expended for the following purposes, viz.: \$18,640 for interest on the Weymouth water loan bonds, becoming due the ensuing year; \$7,300 for superintendent's salary, maintenance of works and pumping station, and \$1,700 for current expenses, commissioners' and office expenses.

Art. 23. To see if the town will vote to appropriate and direct to be paid to the Trustees of the Sinking Funds, out of the income of the water rents for the current year, the sum of \$9,320, to be set apart and invested as a sinking fund for the payment at maturity of the Weymouth water loan bonds.

Art. 24. To see if the town will vote to appropriate the sum of \$3,000, if available, for the purpose of making further constructions as may be deemed necessary for the ensuing year.

Art. 25. To see what sum of money the town will vote to raise and appropriate for hydrants and for the water rent and care of drinking fountains.

Art. 26. To see what sum of money the town will vote to raise and appropriate to be expended in the interest of the public health.

Art. 27. To see what sum of money the town will vote to raise and appropriate for electric lighting.

Art. 28. To see if the inhabitants will authorize the Town Treasurer to borrow such sums of money in anticipation of taxes as will be found necessary to meet the current expenses of the year.

Art. 29. To see what sum of money the town will vote to raise and appropriate toward the Sinking Fund for the payment at maturity of the High School bonds.

Art. 30. To see if the town will reimburse the Board of Selectmen of the year 1901-1902 the amount said board as individuals have paid to Robert M. White as compensation for the use of a dwelling-house as a hospital, and will raise and appropriate a sufficient sum of money therefor; also cost of defending suit.

Art. 31. To see if the town will authorize the Overseers of the Poor to purchase land in the rear of the almshouse sheds for drainage purposes.

Art. 32. To see if the town will vote to accept the provisions of Sec. 22, Chap. 25, Revised Laws, in relation to watering of streets in towns, or take any action in relation thereto.

Art. 33. To see if the town will vote to elect a Board of Health and instruct its Selectmen to make provision for such election in the warrant for the next annual town meeting.

Art. 34. On petition of I. L. Cushman and others, to see if the town will instruct its Board of Fire Engineers to establish a fire alarm box near the residence of Frederick W. Belcher, on Pond street, and vote to raise and appropriate the sum of \$100 to defray the expense of the same.

Art. 35. On petition of Douglas M. Easton and others: To see if the town will raise and appropriate the sum of \$1,500 for the purpose of beginning work on a survey of the town, this money to be expended under the direction of the Superintendent of Streets, and subject to the approval of the Selectmen.

Art. 36. On petition of Alfred W. Cook and others; To see if the town will raise and appropriate \$500 for widening and straitening Chard street, East Weymouth, between Putnam street and Cain avenue, in accordance with plans under which the street was laid out and accepted by the town.

Art. 37. On petition of Maurice C. Daly and others; To see if the town will vote to raise and appropriate the sum of \$300, to

be expended for the purpose of improving the town ways known as Foye avenue.

Art. 38. On petition of Joseph Chase, Jr., and others: to see if the town will raise and appropriate a suitable sum of money, and that the same be expended in grading and draining Broad street, from Madison street to the estate of J. C. Fraser.

Art. 39. On petition of James Condrick and others; to see if the town will raise and appropriate \$300 towards the further working of Summit street.

Art. 40. On petition of George H. Nelson and others; to see if the town will place four incandescent lights on Commercial street, between the residence of Peter Gallant and the top of King Oak Hill.

Art. 41. On petition of Arthur F. Sherman and others; to see if the town will accept the electric light already located in front of No. 75, Hawthorne street and raise and appropriate a sum of money sufficient to defray the expense of maintaining the same.

Art. 42. On petition of Isaac N. Colby and others; to see if the town will instruct its electric light committee to place a suitable light on East street, one hundred yards, more or less, northwest of the railroad crossing.

Art. 43. On petition of D. P. Tilden and others; to see if the town will place an electric light at the junction of Chard street, Maple street and Cain avenue and do such further lighting of Chard street as may seem necessary.

Art. 44. To see if the town will authorize its Selectmen to commence suit for the recovery of any money or property due it.

Art. 45. To see if the town will authorize its Selectmen to sell any buildings with or without the land upon which the same may be located, or any vacant lots of land which it now owns.

Art. 46. To see what sums of money the town will vote to raise and appropriate to provide for any deficiencies in the appropriations of the current financial year, or for any overdrafts already made.

Art. 47. To determine in what manner taxes shall be collected the ensuing year, and to fix the rate of interest upon all taxes remaining unpaid after the time fixed for payment.

Art. 48. To see if the town will accept the list of jurors, as submitted by the Selectmen.

Art. 49. To see what sum of money the town will vote to raise and appropriate for the preservation of shade trees.

Art. 50. At the request of the water commissioners; to see if the town will authorize and instruct the Board of Water Commissioners and the Board of Selectmen to petition the Legislature for authority to take land, by purchase or otherwise on the shore around Great Pond for the prevention of the pollution of the town's water supply, or take any action in relation thereto.

Art. 51. On petition of Joseph Poulin and others; to see if the town will raise and appropriate the sum of \$200 for the further working of Pilgrim road.

Art. 52. On petition of Harvey L. Cushing and others; to see if the town will raise and appropriate a sufficient sum of money for a night officer on the water front in Ward One.

Art. 53. On petition of William W. Castle; to see if the town will vote to raise and appropriate \$1,000 to repair and grade Lake street between Middle street and Charles street.

Art. 54. On petition of William W. Castle; to see if the town will vote to raise and appropriate such sum of money as may be necessary to prevent flowage of water from Lake street upon adjoining property.

Art. 55. By request of the Park Commissioners; to see if the town will vote to raise and appropriate the sum of \$50 for the care and maintenance of the public parks.

Art. 56. On petition of William F. Callahan and others; to see if the town will vote to install an electric light on Washington street, midway between Federal and Congress streets, and raise and appropriate money for maintenance of the same.

Art. 57. On petition of George Horte and others; to see if the town will vote to install an electric light on King avenue, and raise and appropriate money for maintenance of the same.

Art. 58. To see if the town will authorize its Selectmen to contract with the Massachusetts Highway Commission for the construction of a section of a state highway on Main street.

Art. 59. To see what sum of money the town will vote to raise and appropriate for working a relocation of Broad street and

Pleasant street at Jackaon square, upon a decree of the County Commissioners.

Art. 60. To see if the town will accept the report of the Selectmen upon the laying out of a town way, from Bridge street to Monatiquot Bluffs, over the private way known as Saunders street.

Art. 61. To see if the town will accept the report of the Selectmen upon the laying out of alterations on Keith street at the junction of Tremont street.

Art. 62. To see if the town will accept the report of the Selectmen upon the laying out of alterations on Pleasant street at Columbia Square.

Art. 63. To see what disposition the town will make of any unexpended balances of appropriations of former years.

Art. 64. On petition of Arthur W. Phillips and others; to see if the town will locate an arc lamp at the junction of Bayview street and Holbrook Road, Ward 1, and raise and appropriate money for the same.

Art. 65. On petition of Board of Fire Engineers and Supt. of Fire Alarm; to see if the town will raise and appropriate the sum of \$1300 for the purpose of placing a storage battery in the Ward 2 Engine House, to take the place of the present gravity battery.

Art. 66. On petition of Arthur W. Phillips and others; to see if the town will vote to name the westerley end of Bayview street, Bartlett street.

Art. 67. To see if the town will vote to raise and appropriate \$300 for the purpose of working alterations on Keith street at the junction of Tremont street.

Art. 68. To see if the town will vote and appropriate \$300 for the purpose of working Saunders street.

And you are directed to serve this warrant by posting copies thereof, attested by you in writing, in two public places in each voting precinct in said town, seven days at least before the time of holding said meeting.

Hereof fail not, and make due return of this warrant, with your doings thereon, to the Town Clerk on or before the second day of March next.

Given under our hands at Weymouth, this twentieth day of February, in the year of our Lord nineteen hundred and five.

GEORGE L. NEWTON,
BRADFORD HAWES,
ROBERT McINTOSH,
EDWARD W. HUNT,
WALTER L. BATES,
Selectmen of Weymouth.

COMMONWEALTH OF MASSACHUSETTS.

Norfolk, ss.

Weymouth, February 24, 1905.

Pursuant to the within warrant, I have notified and warned the inhabitants of Weymouth aforesaid, to meet at the respective places and times, for the purposes set forth in said warrant, by posting true and attested copies of the same in each precinct in said town as therein directed.

ASA B. PRATT,
Constable of Weymouth.

A true copy, Attest:

JOHN A. RAYMOND,
Town Clerk.

OFFICE OF SELECTMEN, WEYMOUTH, MARCH 1, 1905.

A meeting of the Board of Registrars of Voters was held at the Selectmen's Office this evening for the purpose of canvassing the returns of votes cast in the several Precincts for Town Officers and found that the following persons having received the largest number of votes cast, were declared elected to their respective offices, viz.:

TOWN CLERK.
John A. Raymond.

TOWN TREASURER.
John H. Stetson.

Bradford Hawes,	Robert McIntosh,

JOHN A. RAYMOND,
Town Clerk.

ANNUAL TOWN MEETING.

Pursuant to the foregoing warrant, the annual meeting of the inhabitants of the Town of Weymouth was held at Town Hall, on Monday, March 13, 1905, the meeting being called to order at nine o'clock in the forenoon, and the warrant read by the Town Clerk.

Article 1. Hon. Louis A. Cook was elected Moderator by ballot, the check list being used in the election.

Art. 2. Voted, That the Moderator appoint a committee of five to retire and report later in the meeting a list of nominations of town officers, not required to be elected by ballot.

The Moderator appointed the following persons on the above committee: M. E. Hawes, F. M. Drown, Preston Pratt, Gordon Willis, F. H. Torrey.

Voted to accept the following report of the above committee:

PUBLIC WEIGHERS.

Ward 1.—Herbert A. Newton, C. Lewis French, W. W. Burr, John J. Lane, James P. McManus, John J. Bryne, William J. Coleman, Walter C. Brayshaw.

Ward 2.—Geo. A. Lincoln, Margie Hunt, Wm. T. Brown, W. H. Cushing, Chas. E. Cushing, Geo. M. Keene, T. H. Emerson.

Ward 3.—John F. Condrick, Chas. B. Trask, Susan C. Richards, James Lonergan, Augustus J. Richards, Orin B. Bates, J. F. R. Sherman, Peter E. Condrick.

Ward 4.—Marshall P. Sprague, Wm. Nash.

Ward 5.—Frank H. Richards, Alvin Hollis, Quincy L. Reed, Susie A. Carroll.

SURVEYORS OF WOOD, LUMBER AND BARK.

Ward 1.—Wm. H. Cowen, N. Porter Keene, John J. Lane.

Ward 2.—Weston H. Cushing, Waldo Turner, John W. Bates, Chas. Simmons, W. M. Reamy.

Ward 3.—John B. Rhines, Edward Billings, Chas. B. Trask, Augustus J. Richards, Walter F. Sanborn, Joseph F. Sherman, John F. Condrick, Orin B. Bates, Susan C. Richards, James Lonergan, Henry N. Willoby, Peter E. Condrick.

Ward 4.—William Nash, Gilman B. Loud, Joseph Cummings, Geo. F. Maynard.

Ward 5.—Geo. E. Reed, Alvin Hollis, Quincy L. Reed, Frank H. Richards, Quincy Reed.

FENCE VIEWERS.

Quincy L. Reed, Gilman B. Loud, Chas. Simmons, F. D. Sherman, Solomon Ford.

FIELD DRIVERS.

Benjamin F. Richards, Isaac Walker, Nathaniel B. Peare, Asa B. Pratt, John D. Walsh, Geo. B. Bayley, Geo. W. Conant, Michael Allen, Chas. H. Lovell, Thomas Fitzgerald.

POUND KEEPER.

Russell F. Poole.

Art. 3. Voted to accept the reports of the several boards of town officers as printed.

The committee on sewerage made the following report :

REPORT OF COMMITTEE ON SEWERAGE.

The Committee appointed at the last annual meeting, to consider the subject of sewerage as applicable to Weymouth, herewith submits its report.

Your Committee early realized the magnitude of its task, and the difficulty of making a report which would be of much value, inasmuch as no authority was conferred to expend money in the employment of engineers or in procuring the opinion of experts. Therefore this report can, of necessity, only refer to general features.

In the consideration of this subject the first and most important question which arises is, what disposition can be made of the sewage?

There would seem to be two methods available to Weymouth, but as to which of these is the more practical, the Committee with its present information does not undertake to say. They are as follows :

First. The construction of a main carrying the sewage out to sea.

This to be an independent outlet owned and controlled by Weymouth, and when constructed might be available to the towns of Braintree and Hingham, and other neighboring towns, said towns bearing a proportionate part of the expense if connection is made.

Second. To establish a pumping station on either Weymouth Fore River or Weymouth Back River, and pump the sewage through a force main to the high level gravity sewer on Sea street in Quincy, this being the Metropolitan sewer which discharges about one mile off Nut Island.

One of the advantages of this scheme would be, that the responsibility of the town would cease upon the delivering of the sewage to the Metropolitan sewerage discharging main.

It would be impossible to determine on either of these schemes without long and careful consideration, after securing the opinion of competent engineers.

To a certain extent the town can avail itself without expense, of the opinion of the engineers of the State Board of Health, by making application to said Board for its advice in the matter, as it is provided it may do by Section 117 of Chapter 75 of the Revised Laws.

Your Committee recommend that the town continue, through its present or some other Committee, its investigations and that the town further authorize any Committee it may appoint to apply to the State Board of Health, in the name of the town, for its opinion and advice upon this subject.

No one questions the benefits of a system of sewerage.

One of the first questions asked by those contemplating taking up a residence here, is, as to our water supply and sewerage. We wish we could answer the second question with as much pride as we experience in satisfying the inquirer as to the first.

We believe the problem can be worked out without great and disproportionate expense, and that the benefits to be derived from a financial standpoint, aside from all consideration of comfort and public health, will more than compensate the undertaking by the town at some time in the future, the establishment of a system of sewerage.

We believe that the town should not let the matter drop, but should pursue its investigation until all facts and details pertaining to the subject may be ascertained and laid before the town for due consideration, that the town may be able to then decide whether it seems practical to attempt the undertaking:

ALBERT P. WORTHEN, *Chairman.*

HENRY A. NASH, JR., *Secretary.*

Voted, That the report be accepted, and that the thanks of the town be extended to the Committee for its elaborate report; also that they continue their investigation and apply to the State Board of Health, in the name of the town, for its opinion and advice upon the subject.

Voted, That the following persons serve on the Appropriation Committee for the ensuing year:

Ward 1, C. H. Bolles, B. F. Thomas, John A. Holbrook; Ward 2, M. E. Hawes, W. C. Earl, M. Sheehy; Ward 3, Geo. H. Bicknell, F. M. Drown, J. B. Whelan; Ward 4, Geo. L. Barnes, Thomas V. Nash, Charles Hawes; Ward 5, Alvin Hollis, Geo. E. Reed, H. B. Reed.

And on the Electric Light Committee, Geo. W. Baker, A. Francis Barnes, R. B. Worster, Matthew O'Dowd, Wm. J. Coleman.

Voted, To accept the following supplementary report of the Selectmen.

Supplementary Report of Appropriations and Expenditures, March 1, 1905.

Art. 10. Voted, To raise and appropriate \$6,200 for the support of the fire department.

Art. 11. Voted, To raise and appropriate the sum of \$4,500 for police service.

Art. 12. Voted, To raise and appropriate \$2,200 and further appropriate one-half the dog tax, the income from the Susan Hunt Stetson fund and the rentals of the library building for the Tufts Library.

Art. 13. Voted, To raise and appropriate the sum of \$500 for the maintenance of a public reading room in Fogg Library.

Art. 14. Voted, to raise and appropriate the sum of \$1,000 for the abatement and remittance of taxes.

Art. 15. Voted, To raise and appropriate the sum of \$5,500 for the payment of interest that may become due the ensuing year.

Art. 16. Voted, To raise and appropriate the sum of \$1,000 for printing and advertising.

Art. 17. Voted, To raise and appropriate the sum of \$8,600 for miscellaneous expenses, and that of this amount \$6,000 be for the purpose of paying a note becoming due May 1st, 1905.

Art. 18. Voted, To raise and appropriate the sum of \$6,808.32 for the payment of town officers, the Selectmen and Overseers of the Poor and Board of Health to receive \$2,400; the Assessors, \$1,300; a sum not exceeding \$200 for clerk hire; Town Clerk, \$125; Town Treasurer, \$450; Auditors, 208.32; School Committee, \$300; Sealer of Weights and Measures, \$200; Free Warden, \$100; Town Accountant, \$785.

Art. 19. Voted, To raise and appropriate the sum of \$700 for election expenses.

Art. 20. Voted, To raise and appropriate the sum of \$400 for Memorial Day.

Art. 21. Voted, To raise and appropriate the sum of \$700 for the rent and care of town offices.

Art. 22. Voted, To appropriate from the revenue of the water works for the current year the sum of \$27,745, to be expended for the following purposes, viz.: \$18,745 for interest on the Weymouth water loan bonds, becoming due the ensuing year; \$7,300 for superintendent's salary, maintenance of works and pumping station, and \$1,700 for current expenses, commissioners and office expenses.

Art. 23. Voted, To appropriate and direct to be paid to the Trustees of the Sinking Funds, out of the income of the water rents for the current year, the sum of \$9,380 to be set apart and invested as a sinking fund for the payment at maturity of the Weymouth water loan bonds.

Art. 24. Voted, To appropriate the sum of \$3,000, if available, for the purpose of making further constructions as may be deemed necessary for the ensuing year.

Art. 25. Voted, To raise and appropriate the sum of \$5,000 for hydrants and for the water rent and care of drinking fountains.

Art. 26. Voted, To raise and appropriate the sum of \$230 and appropriate the unexpended balance of this appropriation of last year, to be expended in the interest of public health.

Art. 27. Voted, To raise and appropriate the sum of \$7,400 for electric lighting, and that out of this appropriation the Electric Lighting Committee be and are hereby instructed to provide and install lights to meet the requirements of Articles 40, 41, 42, 43, 56, 57 and 64. •

Art. 28. It was unanimously voted that for the purpose of procuring a temporary loan to, and for the use of the Town of Weymouth, in anticipation of the taxes of the present municipal year, the Town Treasurer is hereby authorized and directed to borrow, from time to time, with the approval of the majority of the Selectmen of said town, a sum or sums in the aggregate amounting to \$140,000, and to execute and deliver the note or notes of the town therefor, payable in one year from the time the loan is made. The said debt or debts incurred by a loan or loans to the town under this vote are to be paid from the said taxes of the present municipal year.

Art. 29. Voted, That the town raise and appropriate the sum of \$5,000 toward the Sinking Fund for the payment at maturity of the High School bonds; the Selectmen to pay the same to the Commissioners of the High School Fund on or before Nov. 1.

Art. 30. Voted, That the town reimburse the Board of Selectmen of the years 1901 and 1902 for the amount expended by them for the purpose stated in this article, and that the town raise and appropriate \$210 therefor.

Art. 31. Voted, That the Overseers of the Poor be authorized to purchase land, in the rear of the Almshouse shed, for drainage purposes, at a sum not exceeding \$50 and to build a cesspool on the same.

Art. 32. The article in relation to acceptance of Sec. 22, Chap. 25, Revised Laws, was passed over.

ART. 33. In relation to the election of a Board of Health was laid on the table.

Art. 34. Voted, That the subject matter of this article be referred to the Board of Fire Engineers.

Art. 35. Voted, The matter of a survey of the town be referred to a Committee of five to be appointed by the Moderator, who are to serve without incurring any expense to the town. The Moderator appointed the following:

D. M. Easton, F. H. Torrey, Bradford Hawes, W. C. Barnes, C. H. Willoby.

Art. 36. Voted, That the town appropriate the unexpended balances of appropriations of former years consisting of \$343.28 from the appropriation for drain for Commercial street, \$189.02 from the appropriation for the stone crusher and scales, and

\$17.15 from the appropriation for abating the Broad street nuisance, and being in all, \$549.45, to the widening and straightening of Chard street, East Weymouth between Putman street and Cain avenue, in accordance with the plans under which the street was laid out and accepted by the town.

Art. 37. Voted, That the subject matter of this article be referred to the Board of Selectmen.

Art. 38. Voted, That the subject matter of this article be referred to the Board of Selectmen.

Art. 39. Voted, That the town raise and appropriate the sum of \$300 towards the further working of Summit street.

Art. 44. Voted, That the Selectmen be authorized to commence suit for the recovery of any money or property due the town.

Art. 45. Voted, That the Selectmen be authorized to sell any buildings with or without land upon which the same may be located, or any vacant lots of land which it now owns.

Art. 46. Voted, That the town raise and appropriate the sum of \$6,000 and further appropriate the bank and corporation taxes for the purpose stated in this article, and that of this amount, \$3,344.80 be for the payment of deficiencies for the repair of highways and removal of snow; \$11.99 for deficiencies for the working of Pilgrim Road; \$545.41 for deficiencies in the abatement and remittance of taxes; \$108.55 for deficiency for interest and discount; \$800 for deficiency for Soldiers' Relief; \$97.18 for deficiency on Assessors' valuation books and \$3500 for deficiency for support of poor.

Art. 47. Voted, That all taxes shall become due and payable on or before the 10th day of October next and that the collector be instructed to collect forthwith, according to law, all taxes remaining unpaid after that date, with interest at the rate of six per cent. per annum, and that the salary of the collector be six mills on the dollar.

Art. 49. Voted, That the town raise and appropriate the sum of \$200 for the preservation of shade trees.

Art. 50. Voted, That the Board of Water Commissioners and the Board of Selectmen be authorized to petition the Legislature for authority to take land, by purchase or otherwise on the shore

around Great Pond for the prevention of the pollution of the town's water supply, or take any action in relation thereto.

Art. 51. Voted, To raise and appropriate the sum of \$200 for the further working of Pilgrim road.

Art. 52. The article in relation to a-night police in Ward One, was passed over.

Art. 53. Voted, that the town instruct the superintendent of streets to expend from the appropriation for repairs of highways, etc., the sum of \$500 for the repair and grading of Lake street between Middle street and Charles street.

Art. 54. No action.

Art. 55. Voted, That the town raise and appropriate the sum of \$50 for the care and maintenance of public parks.

Art. 58. Voted, To authorize the Selectmen to contract with the Massachusetts Highway Commission for the construction of a section of the state highway on Main street.

Art. 59. Voted, That the town raise and appropriate the sum of \$300 for working a re-location of Broad street and Pleasant street at Jackson Square upon the decree of the County Commissioners.

Art. 60. Voted, To accept the report of the Selectmen upon the laying out of a town way, from Bridge street to Monatiquot Bluffs, over the private way known as Saunders street.

Art. 61. Voted, To accept the report of the Selectmen upon the laying out of alterations on Keith street at the junction of Tremont street.

Art. 62. No action.

Art. 63. Disposed of, under Article 46.

Art. 65. Voted, That the town raise and appropriate the sum of \$1,300 for the purpose of placing a storage battery in the Ward 2 Engine House, to take the place of the present gravity battery, and that the subject matter hereof be referred to the Board of Fire Engineers and the Superintendent of Fire Alarm as a Committee to carry same into effect.

Art. 66. Voted, To name the westerly end of Bayview street, Bartlett street.

Art. 67. Voted, That the town raise and appropriate the

sum of \$300 for the purpose of alterations on Keith street at the junction of Tremont street.

Art. 68. Voted, That the town raise and appropriate the sum of \$300 for the purpose of working Saunders street.

Voted, To adjourn (11.27 a. m.).

Attest : - JOHN A. RAYMOND,
 Town Clerk.

JOHN A. RAYMOND,
Town Clerk.

CLERKS' DISTRICT MEETING.

The undersigned, Town Clerk of Weymouth, met the Town Clerk of Braintree, at Braintree, at twelve o'clock at noon, Friday, Nov. 17, 1905, the time and place appointed for the Clerks of the Sixth Norfolk District to meet to examine the returns of votes cast in said district for Representatives to General Court, and found that Aubrey Hilliard, of Braintree, and George L. Barnes, of Weymouth, having received the largest number of votes, were duly elected, and so certified according to law.

JOHN A. RAYMOND.

The following is the vote of the Town of Braintree for Representatives to General Court as certified to by the town officers :

George L. Barnes of Weymouth	536
Auburey Hillard of Braintree	591
Frank McCarthy of Weymouth	261

A true copy—Attest :

JOHN A. RAYMOND,
Town Clerk of Weymouth.

JOHN A. RAYMOND,

Town Clerk.

WEYMOUTH, February 1, 1906.

REPORT OF THE LIGHTING COMMITTEE.

WEYMOUTH, January 1. 1906.

To the Honorable Board of Selectmen :

The Lighting Committee respectfully submits the following report :

At the annual Town Meeting held March 1905, it was

Voted, To raise and appropriate the sum of \$7,400, for electric lighting, to be expended under the direction of the following committee :

A. Francis Barnes, chairman ; Russell B. Worster, Matthew O'Dowd, George W. Baker and W. J. Coleman.

Your committee made a contract with the Weymouth Light and Power Co. to light the streets by electricity, on a basis of 33 arc lights and 296 incandescent lights for the sum of \$611.36 a month (the same rate as in previous years, that is \$70 for arc and \$17 per year for incandescents) less rebates for poor lights and lights not burning.

Having received instructions from the last annual Town meeting in regard to the several articles for lights in different parts of the town, and as we only had an increase of \$200 for the said articles we installed incandescent lights in place of arc lights which were asked for, as it has been the experience of the several committees that they gave better satisfaction excepting in the principal squares, placing them in different parts of the town so as to agree as nearly as possible with the said Articles of the Warrant.

The Committee at its meeting in November voted that the lighting be continued mornings in winter of the coming year, on the same condition and basis as last year, for the convenience of workmen leaving town by early cars and trains and not having any appropriation for the same, we voted to use the rebates that we had deducted from the bills as presented to us which we have found sufficient for the purpose.

We have several requests for lights and especially from the summer residents, along the shore. As our shores are now being built up with fine houses and bringing in taxable property to our town it is no more than right that something should be done towards lighting the town streets leading to the different beaches. We would also recommend that the people living near any electric light and finding the same not lighting would send word to us, so that it may be attended to properly. We find most of the trouble is with boys breaking the globes and lamps. We would be very glad to hear of any complaints, as we do not want to spend money for anything we do not get value for.

As we have never exceeded our appropriation which just covers our expense for lighting we cannot put in any new lights without an extra appropriation at the Annual Town Meeting.

A. FRANCIS BARNES, *Chairman*,
 RUSSELL B. WORSTER,
 GEORGE W. BAKER,
 MATTHEW O'DOWD,
 W. J. COLEMAN, *Clerk*.

W. J. COLEMAN,
Clerk.

REPORT OF SUPERINTENDENT OF STREETS.

To the Board of Selectmen :

GENTLEMEN :—I hereby submit my report for the year ending Dec. 31, 1905.

The highway appropriation has been expended on general repairs, which includes such items as removal of snow, care of bridges, culverts and drains, cleaning streets, renewal of fences, street signs and various other ways, many of which are but indirectly concerned in the improvement of the surface of the highways. When it is considered that this work has to be distributed over 110 miles of road, it can be readily seen that with our present appropriation it leaves nothing for new construction.

The care of the roads is becoming more difficult every year and the public demands good roads properly maintained.

We have a stone crusher, roller, road material and plenty of labor. If in addition to our usual work we could thoroughly rebuild a portion of some of our most important streets each year, we would be able in a short time to show a substantial gain in the condition of our roads and I wish the Town to bear these facts in mind by making this department as liberal an appropriation as possible, if it wishes its streets to assume the standard, as set by other towns and cities.

As in previous reports, I will again call your attention to the imperative needs of surface drains in Ward One and Two, at junction of North and Sea streets, Broad street opposite Dizer's Factory and Commercial square.

STATE ROAD.

The unfinished work on this road has been done, and the work has been accepted by the Highway Commissioners.

HIGHWAY APPROPRIATIONS,

The special highway appropriations are as follows :

Saunders Street—This street was resurfaced with gravel and sidewalks built on west side.

Pilgrim Road—This street resurfaced with gravel but was unable to complete the work and it will require a small additional appropriation to finish the job.

Summit Street—This street was rebuilt from Granite street to the residence of James McAvoy. Encountered a great deal of ledge during the progress of the work.

Keith Street—This street was built to the new location accepted by the town.

Chard street—Rebuilt from Putnam to Maple street. During the progress of the work, encountered a great deal of ledge.

WARD ONE.

All the streets received general attention, gutters and streets being cleaned when needed and such repairs made as deemed necessary. The most important were as follows :

Norton street—Rebuilt this street to point nearly opposite cemetery. Removed a great deal of ledge which required blasting to make a satisfactory job. Would recommend that the work be continued to North street the ensuing year.

River street—Resurfaced with gravel from Bridge street to Lovell street.

Sea street—Resurfaced with gravel about 600 feet toward beach.

The road machine was used where it could be worked to an advantage.

The sidewalks received minor repairs where deemed most necessary, the most important being on Bridge street.

During wet weather the square at junction of North and Sea streets is nearly impassable. There is no way to relieve this condition but to put in a suitable drain with the necessary catch basins and convey the water from this point to Neck street. A special appropriation should be made for this work.

WARD TWO.

The principal work was done on the following streets :

Broad street—Resurfaced with gravel from Putman street to Central square.

Cedar street—Refaced from High to Hawthorne street.

School street—Resurfaced with gravel.

Lafayette avenue—Resurfaced with gravel, built two new catch basins.

Commercial street—At junction of East and Madison street rebuilt, making a decided improvement by changing grade of hill.

Lake street—In accordance with the vote at Town meeting \$500 was expended on this street, resurfaced with gravel from Middle street to a point about 1200 feet east. Built two catch basins and laid 275-10 inch Tile Pipe. Would recommend that this work be continued until street is completed.

Sidewalks repaired on Broad, Middle, Grant, Shawmut and Commercial streets.

Among the streets in need of immediate repairs are Shawmut, Water, Hawthorne and Commercial streets.

WARD THREE.

Owing to the hills this is one of the hardest wards to maintain and to prevent washouts great care must be given to drains, culverts and pipe crossings. Most of the money expended in this ward is for the above and leaves little for new work. The principal work was on the following streets:

Broad street—Resurfaced with crushed stone from Vine to Washington street.

Washington street—From Front street to Braintree line with crushed stone.

Summer street—From Front street to residence of John F. Dwight, with gravel.

Foy avenue—Rebuilt from Broad street to end.

Webb, Phillips, Commercial and Front streets were repaired in worst places with gravel.

Sidewalks on Commercial, Front, King avenue, Sterling and Washington streets received some attention. Relaid brick sidewalks in front of Mr. Patrick Casey's on Broad street. The sidewalks in general are in poor condition and need attention.

Commercial street, between railroad crossings is in bad condition. This should be thoroughly rebuilt with crushed stone. This work is too expensive to take out of the regular appropriation, and some special provision should be made to repair this road.

WARD FOUR.

The principal road work was as follows :

Front street—From West to Main street, also worst places from Mill to Winter street.

Middle street—Different sections re-surfaced with gravel from cemetery to Main street.

Pleasant, Washington streets and Park avenue have received some attention.

In accordance with the vote at last town meeting, retaining wall near church was rebuilt.

Among the streets which should receive immediate attention are Pine and Park streets which are in very bad condition.

WARD FIVE.

The work has been distributed over the different streets in the ward, small repairs being made on nearly all the streets. The principal work was as follows :

Union street—Rebuilt with gravel from Central street to a point opposite the residence of Addison Stoddard. The rest of the street is in very poor condition and as this is a very important thoroughfare, it should be rebuilt to the Rockland line as soon as possible.

Randolph street—Worked with road machine and resurfaced with road material near at hand from the Holbrook line to a point about 600 feet north of Forest street. This street still needs extensive repairs.

Among the sidewalks repaired were the following :

Pleasant, Pond, Columbian streets, also tar concrete sidewalk repaired on Pleasant street opposite Clapp's market.

Columbian street drain—The surface water during and after a heavy rain, near the Union Church on this street, made it nearly impassable. To remedy this, two catch basins have been constructed and about 400 feet of 8-inch tile drain laid which so far has worked satisfactory.

The following is a schedule of property of the department :

1 Steam roller, 1 steam roller wheel, 1 street sprinkler, 1 road machine, 1 portable engine and boiler, 30 gallons engine oil, 1½ inch globe valve, 2 fusible plugs, 1-18 inch monkey wrench, 1-18 inch Stilson wrench, 1 shovel, 1 rake, 1 hoe, 1 lantern, 1 bin for crushed stone on East street, 2 6-feet screens for stone crusher,

1 old stone crusher (Washington street), 1 stone crusher and bin (Ells Pit), 1 platform scale, 1 boiler inspirator, 1000 feet spruce lumber.

The foreman in the different wards have the following property in their possession :

WARD ONE.

5 snow plows, 1 gutter plow, 1 rake, 4 lanterns, 4 picks, 4 screens, 6 feet 10 inch tile pipe.

WARD TWO.

8 snow plows, 1 road plow, 1 gutter plow, 3 tampers, 1 paving hammer, 1 trowel, 8 lanterns, 4 picks 2 screens, 1 rake, 2 grub hoes, 1 hoe, 1 stone dray, 1 padlock, 1 manhole cover and frame, 8 feet 8 inch tile pipe.

WARD THREE.

6 Snow plows, 1 gutter plow, 6 forks, 5 rakes, 13 lanterns, 2 bars, 3 picks, 1 paving hammer, 1 screen, 3 sledge hammers and 4 handles, 6 wheel barrows, 3 post hole scoops, 1 grub hoe, 3 shovels, 2 tool boxes, 25 marking pins.

WARD FOUR.

5 snow plows, 4 picks, 1 shovel, 1 bar, 1 fork, 3 screens.

WARD FIVE.

5 Snow plows, 1 gutter plow, 2 street hoes, 2 forks, 2 grub hoes, 2 post hole scoops, 30 feet 8-inch tile pipe, 1 8-inch Y.

At the close I desire to thank the Board of Selectmen for their kindness and ready co-operation, also the employes for their assistance and zeal in serving the interests of the town.

Respectfully submitted,

IVERS M. LOW,

Superintendent.

SUITS AT LAW.

As required by the Town By-Laws the Selectmen herewith submit a report of the law suits, during the year, in which the town is concerned.

The case of the city of Quincy against the town of Weymouth to recover money expended under laws for the relief of paupers, for the benefit of one Mrs. Sinnott, has been compromised by the payment of fifty (\$50) dollars.

Two actions of tort of five thousand (\$5,000) dollars each, brought in the Superior Court, one against Chief of Police Thomas Fitzgerald, and the other against Police Officer Benjamin F. Richards, in which Dorcas J. Holmes sought to recover damages for injuries alleged to have been sustained by her at the hands of the defendants while they were engaged in the discharge of their duty in the service of a search warrant, and which were defended by the Town, terminated in favor of the defendants in each case.

The writ of *scire facias* brought by Jesse P. Leonard against the Town. to recover money due William D. Davis at the time of the service of a trustee writ on the town in 1899, has been tried, but final disposition has not been made of the action.

In April, 1905, a petition was filed in the Supreme Court by Stephen A. R. Pratt against the present Board of Selectmen, asking that the Supreme Court issue its writ of mandamus in favor of the petitioner and directed against the Board of Selectmen, requiring them to consent to allow the petitioner to remove a building belonging to him and located near Commercial square, East Weymouth. The action was tried in the Supreme Court in Boston, resulting in the writ of mandamus being refused and the petition dismissed.

The Bill in Equity filed in the Superior Court by Patrick Whelan and Jeremiah Coffey, seeking an order of the court requiring the town to remove a post alleged to have been located within the limits of a private way leading off Common street in ward three, has been dismissed.

The petition of David Ford for the assessment by a jury for damages sustained by him in consequence of the town laying out a street known as Wessagusset road over his land in ward one, has been settled without trial by the payment of seven hundred dollars.

The action of Robert M. White against the Board of Selectmen, to recover damages for taking possession of a dwelling house belonging to him, and using the same as a hospital on the occasion of the fatal illness of smallpox of the late George Ford, was tried at the February sitting of the court, resulting in a verdict for the plaintiff against the selectmen, in the sum of eighty-five (\$85) dollars.

An action has been brought by the town of Weymouth against the city of Quincy, to recover the sum of two hundred and ten (210) dollars, for money expended by the town for the support of one Sarah A. Cain under the laws for the relief of paupers and whose settlement is alleged to be of Quincy, and for which it is claimed Quincy is liable. The case has not been reached for hearing.

FORE RIVER BRIDGE COMMISSION.

Since the last report the vacancy on the Commission appointed to award and determine the amount to be paid by the County of Norfolk, cities, towns and quasi-public corporations, fairly proportionate to the special benefits received, for the cost and maintenance of the Fore River Bridge, occasioned by the death of the late Henry P. Moulton, has been filled by the appointment of Prescott Keyes, Esq., of Concord.

Proceedings were readvertised by the new Commission thus constituted, brief hearings held and the matter finally submitted to the Commission for its determination.

The statute providing for the bridge requires the Commission to include as a part of the cost of the bridge, the expense of the Commission. It was found that the amount allowed by the Superior Court as such expense, in addition to what had already been expended by the County Commissioners, in the construction of the bridge, exceeded somewhat the amount limited under the original act as the maximum expense.

The County Commissioners did not feel authorized to pay this excess without legislative approval, and the Commissioners on

apportionment have withheld their report for the purpose of ascertaining what action, if any, the Legislature would take in reference to the matter.

A bill has been introduced in the present session which if passed will confer upon the County Commissioners the requisite authority to pay the compensation and expense of the Commission to the amount approved by a Justice of the Superior Court and charge the same to expense and construction of the bridge, although said amount shall make the total expense of said bridge more than the sum originally authorized.

Upon the favorable passage of this bill it is expected that the report of the Commission will be made.

METROPOLITAN PARK COMMISSION.

Chapter 419 of the Acts of the Legislature of the year 1899, provided that in the year 1900 and in every fifth year thereafter the Supreme Judicial Court should appoint three Commissioners to determine and make award of the proportions in which each of the cities and towns of the Metropolitan Parks District (in which district Weymouth is included) shall annually pay money into the treasury of the Commonwealth, to provide the amount necessary to meet the interest and sinking fund requirements, and the amount required to meet the expenses for that year of the Board of Metropolitan Park Commissioners, and for the care, maintenance and operation for that year of the parks, reservations, boulevards and other works, acquired, cared for or controlled by said Board.

In 1900 a Commission was duly appointed that determined said proportions for the first five year period. During this period Weymouth has been contributing in accordance with the award of said Commission.

Early in the year 1905, a petition was filed in the Supreme Judicial Court for the county of Suffolk, by William B. de las Casas et al. Metropolitan Park Commissioners, for the appointment of a second commission to make a new award for the second five year period.

Under this petition Arthur P. Rugg, Esq., of Worcester, James F. Jackson, Esq., of Fall River and John J. Flaherty, Esq., of Gloucester were appointed Commissioners for the new apportionment.

At the same time another petition was filed by the Metropolitan Park Commissioners under the provisions of Chapter 491 of the acts of 1901 for the appointment of a Commission to determine which of certain cities and towns are especially benefitted by the use of what is called the Wellington Bridge, across Mystic River, between Somerville and Medford, and the extent of such benefit, and to what extent the Metropolitan Parks District, by the use of said bridge for park purposes, and to determine in proportion to such benefits the part of said bridge and approaches to be paid by each of the said cities and towns and by the Metropolitan Parks District. Under this petition the same Commission, consisting of Messrs. Rugg, Jackson and Flaherty were appointed.

Hearings were had during the Summer, on both matters. Weymouth filed a brief, and argument in its behalf was made before said Commission. The report of the Commission was subsequently made and has been confirmed by the Supreme Judicial Court.

The effect upon Weymouth of the findings of the Commissioners, briefly stated is, that no direct assessment is made upon the town on account of the Wellington Bridge. On the other, or general petition, the percentages which Weymouth must contribute will be less than under the report of the earlier Commission covering the first five year period.

REPORT OF THE PARK COMMISSIONERS.

The Board of Park Commissioners has the honor to submit herewith its annual report for the year ending Dec. 31, 1905 :

No additions by gifts, or otherwise, have been made to the Park Area, it being as last reported.

Webb Park at the Landing has been kept in as good condition as practicable, considering the use made of it by the public, which includes sometimes thoughtless men and boys, who seem to think they cannot enjoy themselves without damaging some tree or shrub, which perhaps, has been tenderly cared for by the superintendent, only to have his care expended for naught. We are pleased, however, to report that such depredations are exceptional, and that the large majority of visitors respects the reasonable rules and regulations of the Board, and are pleased to make use of the park subject to said rules.

The grading of Summit street the past season greatly improved it as a street, and incidentally helped the park. A little more labor is now needed to work the street to its full width on the side abutting on the park, to make a harmonious connection between the street and park. We recommend an appropriation this year sufficient to complete this work.

A plot of ground has been broken up on one side of the park, infrequently used, where it is proposed to start a nursery of young trees, from which to draw when wanted for planting out in the parks, or perhaps along the highways of the town, if we are successful in growing a sufficient quantity.

Following is a statement of receipts and expenditures, viz :

Town appropriation	\$50 00	
Edward P. Condric, for pasturage . .	10 00	\$60 00
Expenditures, Webb Park :		
Jeremiah Coffey, for labor	\$21 50	
Dummer Sewall, for labor	6 75	
H. A. Richards, plowing and harrowing	7 00	
W. H. Clapp, superintending	5 00	40 25
Balance unexpended		\$19 75

Beals Park has been kept in its usual condition the past year. On account of the very dry spring, rainfall being small, the pond became very dry, so that we were enabled to thoroughly clean the bottom of all refuse that had been collecting for years. In connection with some of the abutters, a stone wall has been built along the south side of the pond, which has added greatly to its beauty.

Following is a statement of receipts and expenditures :

Balance on hand Jan. 1, 1905	.	.	\$165 62	
Received of J. H. Stetson, Treas.	.		40 40	\$206 02

EXPENDITURES.

Water tax and repairs	.	.	.	\$9 31	
S. Delorey, labor	.	.	.	18 25	
Stone wall	.	.	.	13 83	\$41 39
					<hr/>
Balance on hand	.	.	.		\$164 63

Great Hill remains in same condition as it has for several years.

Respectfully,

LOUIS A. COOK,
FRANK H. TORREY,
WM. H. CLAPP,

Park Commissioners.

REPORT OF THE TRUSTEES OF THE TUFTS LIBRARY.

The Board of Trustees respectfully submit their twenty-seventh annual report as follows :

The Library was open 304 days for the delivery of books during the year 1905. 54,042 volumes were loaned for home use, an average of 178+ per day. The largest number of books loaned on any one day was 464 on February 23, and the smallest number was 40 on May 8. 21,540 volumes were distributed to borrowers through the different delivery stations as follows :—

Precinct 1, J. W. Bartlett & Co.	5,394
Precinct 1, A. B. Sladen	2,480
Precincts 2 and 6, J. P. Salisbury	6,812
Precincts 2 and 6, Bates & Humphrey	2,337
Precinct 4, W. W. Pratt	1,282
Precinct 4, William Nash	1,550
Precinct 5, Fogg Memorial Library	1,685

CLASSIFICATION OF CIRCULATION.

Arts, .030 ; biography, .020 ; fiction including juvenile, .682 ; history, .034 ; literature, .020 ; natural science, .024 ; poetry, .012 ; social science, .011 ; theology, .003 ; travels, .040 : periodicals, .124.

WORK WITH THE SCHOOLS.

2543 volumes have been loaned to the teachers on their special cards beside the collection of books sent to seven of the schools situated at a distance from the library. This work has proved very satisfactory and in no case has a teacher complained of the extra responsibility, while most of them have spoken of the profit and enjoyment their pupils have derived from the books.

The third vacation reading list was compiled for the schools in June. These lists have been found so helpful that it seems best to give them permanent form so that parents also may use them. The list for grades I-VI may be found in Appendix C.

REGISTRATION OF BORROWERS.

327 new applicants have been given cards, 175 the non-fiction cards; also students' cards, on which ten books may be borrowed at one time, have been granted to all needing this privilege.

The total number of applications filed since the last registration is 5306.

EXAMINATION OF THE BOOKS.

The annual examination of the books was made as usual, and 9 volumes are still missing.

3 books that were lost have been paid for by the borrowers.

2 books recorded as lost last year have been returned.

133 soiled and worn books have been withdrawn and many more must be discarded soon.

ACCESSIONS.

During the year 758 volumes have been added to the library, including 107 donated, 173 replacing worn copies and 33 periodicals.

Many technical books are needed, and should be purchased soon to satisfy the urgent requests of students, machinists, engineers, shipbuilders, house builders, and other workers.

The following are some of the more important books added during the year 1905 :

Abbot's American merchant ships and sailors (317.103), Bain's Scandinavia (616.36), Besant's East London (232.97), Bryce's Studies in contemporary biography (917.59), Champlin's Young folks' cyclopædia of natural history (Ref.), Collins' Studies in Shakespeare (820.41), Foster's Arbitration and the Hague Court (315.112), Gibson's Our native orchids (735.141), Griggs' Moral education (315.129), Grout's Mosses with a hand lens (735.126), Harwood's New creations in plant life (726.157), Hazell's Annual 1905 (Ref.), Henderson's Children of good fortune (315.135), Ireland's Far Eastern tropics (314.118), James' Indians of painted desert region (227.151), Kasson's Evolution of the Con-

stitution of the U. S. (311.112), Keltie's Statesman's year book (Ref.), Lawrence's Sir Arthur Sullivan (817.45), Mabie's Backgrounds of literature (131.41), Macquoid's Pictures in Umbria (225.104), Nicholas' Around the Caribbean and across Panama (227.146), Parker and Bryant's Old Quebec (616.53), Peterson's How to know the wild fruits (735.134), Richards' History of Marshfield, vol. 2 of (617.87), Saintsbury's Loci critici (113.56), Sartain's Reminiscences of a very old man (917.48), Scruggs' Columbian and Venezuelan republics (230.142), Shoemaker's Great Siberian railway (236.62), Sparks' U. S. of America, 2 v. (612.143), Stillman's Autobiography of a journalist, 2 v. (917.47), Trowbridge's My own story (214.82), Who's who, 1906 (Ref.), Wilson's New York, old and new, 2 v. (612.122).

See also Appendix B for the list of books purchased from the Susannah Hunt Stetson Fund.

CATALOGUES.

The long needed revision of the card catalogue is now in process. A modern 60-tray case has been placed in the Delivery Room to which all cards of works other than fiction will be transferred. In time the larger, printed cards issued by the Library of Congress, supplemented by type-written cards will replace those now used. The cards for fiction are in the smaller cases.

No printed class-list nor bulletin has been published during the year but the frequent calls for one show that as soon as the funds will warrant a bulletin should be issued.

The lists of new accessions have been printed as usual in the local papers.

READING AND REFERENCE ROOM.

This department is invaluable to our citizens, for books that constitute a reference library are too expensive for the average person to own.

Books of reference grow old and their usefulness wanes as the sciences develop and history is made, so that new works and new editions must frequently be added. The most urgent need at present is an up to date atlas and a gazetteer.

The American Catalogue, 2v. ; Appletons' Cyclopædia of American biography, v. 7 ; the new edition of Chambers' Cyclopædia

of English literature, 3v., and Granger's Index to poetry and recitations have been added during the year.

While the books in this room are not usually loaned, many of them, by special permission, may be taken home at the closing hour if returned by 2 p. m. on the next library day.

The periodicals, listed in the previous report, may still be found here with these changes: the Scientific American Building Monthly has become the American Homes and Gardens; Marine Engineering, American Machinist, and the Children's magazine have been added; and Education has been discontinued.

The Library continues to be useful to the various study and reading clubs of our town and there has been a marked increase in the reference work during the year.

ART EXHIBITIONS.

The subjects of the Library Art Club Exhibitions of Photographs held during the year were: California; the Canadian Pacific; German Festoons; Florence, 5; Plymouth; Rouen; The Yellowstone, 1; and American Sculpture.

During June an interesting and successful Drawing Exhibition of the Weymouth public schools, grades I-IX was held. The teachers and pupils, inspired by their efficient instructor, Miss Grace Hackett, were so enthusiastic in preparing for this, that every available space was utilized for their work. Artistic posters, announcing the exhibition, designed by the pupils of the High School, were placed in the different villages. As each pupil had sent specimens of his work, there were visitors from remote parts of the town who came specially for this exhibition, apparently realizing for the first time that there was a Town Library.

GIFTS.

Books and pamphlets have been received from thirty-four different sources; Our Dumb Animals, The Protectionist, Weymouth Gazette, Weymouth Transcript and Woman's Journal from the publishers and The Musician from Mr. Gutterson.

Annual reports, bulletins and other publications have been received from fifty-four libraries. These are appreciated, being of value in the work of our library.

The trustees take this opportunity to acknowledge these gifts and to thank the donors, a list of whom may be found in Appendix A.

Miss M. Elizabeth Foye, an assistant for many years, has removed from town. She will long be remembered for her genial manner at the delivery desk.

The Library is free to all residents of Weymouth who sign an agreement to obey the rules of the library. Application blanks can be obtained at the delivery stations when it is not convenient for the borrower to visit the library, and books will be sent with the cards if lists of numbers are received with the applications.

To find the resources of the library on any subject consult the card catalogues, class-lists, Poole's Index and Annual Indexes, A. L. A. Index of Literature and the Library Index. Consult also the librarians who are always glad to render any assistance possible.

CHARLES P. HUNT,

By order and in behalf of the Trustees.

CHARLES P. HUNT,
Treasurer.

ANNUAL REPORT
OF
WATER COMMISSIONERS
OF THE
TOWN OF WEYMOUTH, MASS.

1905.

WATER COMMISSIONERS.

DOUGLAS M. EASTON, Chairman.

FRANK H. TORREY, Clerk of Board.

WENDALL B. CLAPP.

JOHN H. STETSON, Treasurer.

GORDON WILLIS.

IVERS M. LOW, Superintendent.

CHARLOTTE E. BRIGGS, Clerk.

C. B. KLINGEMANN, Engineer.

Office at East Weymouth, Mass.

WATER COMMISSIONERS' REPORT

JANUARY 1ST., 1906.

The Board organized March 20th., 1905, by the choice of Douglas M. Easton, Chairman; Frank H. Torrey, Clerk and Register; John H. Stetson, Treasurer.

Frank H. Torrey was chosen Collector at a salary of \$235.

I. M. Low continues as Superintendent at a salary of \$750.

Miss C. E. Briggs continues Clerk at the office at a salary of \$450.

C. B. Cushing continues as Accountant at a salary of \$200.

C. B. Klingemann continues as Engineer at the Pumping Station at a salary of \$1,000.

In presenting our report to the tax payers of the town of Weymouth, we are pleased to say at the outset that much improvement has been shown regarding the various topics discussed in our report of 1905; much more can be done if you will co-operate with us.

FINANCE.

In our report of 1905, we endeavored to impress on the minds of our citizens, the importance of paying their bills promptly. We are pleased to report this year that considerable attention was paid to our appeal, as you will notice by examination of the Treasurer's report, especially to that part which relates to the balance due Jan. 1st., 1905 and balance due Jan. 1st., 1906. We trust the year 1906 will show a still further advancement towards the end so that in the near future, there will be practically nothing due at the beginning of the new year.

REBATES.

While a decided improvement has been made in this line during the past year, yet there are some to whom this question should appeal to more strongly than heretofore, for by a due attention to the printed slip attached to every bill, less friction will be mani-

tested between owners of property and our office. It is of importance that every citizen, on receipt of his bill, should examine minutely every charge, and if not correct, he should report all errors or omissions to the office immediately, and not wait three months and then come to the office and say "my house has been vacant two months" or "I have not used my hose this summer".

Such may be the case but as we have been imposed upon quite a number of times, we feel disposed to doubt such statements, this causes hard feelings and to do away with any discussions, we say "report promptly at the office".

LABOR AND MATERIAL.

On account of the severe winter of 1905, and the length of time that a great deal of the pipe has been in use, this department has been kept very busy. We desire to again call your attention to the fault-finding regarding our charges for labor and material.

We cannot find men, horses, and material, travel three miles, and make much profit on a job which the owner thinks ought not to cost over fifty cents; as we have said before, this department does not do the work for profit. We pay the money for labor and material, and must make our charges accordingly, and we trust that *you* will so consider them, that we may, at least, get a new dollar for an old one.

POND.

The sluice-way on Randolph street, built many years ago of plank and joist, is in a very dilapidated condition, and a new one must be constructed this year after the spring floods have abated. It is our intention to build this time of concrete, which will then be practically indestructible.

ELECTROLYSIS.

In our last report we intimated that arrangements had been made to have an electric survey made, which was done during the summer by M. A. Carter, assisted by Supt. Low and Mr. Easton of the Board, and we are glad to report that the conditions are not as bad as we expected to find them, judging from the trouble that other towns are having; yet the trouble is there, and sooner

or later we must expect to meet it; in the meantime the Street Railway Supt. has been advised of the condition and informed that they will be held responsible.

The remedy suggested by Electrician M. A. Carter is supported by other expert electricians, while others do not advocate the plan, believing it only prolongs the agony, and that the only safety is in a double trolley.

“When Doctors disagree, what can we poor mortals do?”

See special report of M. A. Carter:

EAST WEYMOUTH, January 10, 1906.

To the Weymouth Water Board:

GENTLEMEN: In reply to your request for a statement of the electrolytic action on the Weymouth water pipes, I would respectfully submit the following report:

Electrolysis of the subterranean metallic structures is primarily an accelerated erosion caused by certain conditions being present when a current escapes from a metallic surface. The current finds its way to the piping system, for it presents a path of conduction back to the power station, and the amount of current conducted by the water pipes will be in the ratio that the earth resistance plus the pipe resistance bears to the rail-return resistance at portions of the system adjacent to the power station (when the trolley wire is positive potential.)

This current has to leave the pipes and return to the negative bus, for exactly the same volume of current must return to the power station as is sent out from it. If this current depart with sufficient electrical pressure between the pipe and adjacent moisture in the soil, it will change the constituents of the soluble matter held in the water, which will in turn on account of their new form, more actively attack the pipe adjacent to the point where the solutions were decomposed.

It is necessary to have the following elements in combination in order that the effect may be produced called electrolysis.

A metallic surface surrounded by impure water and a current leaving the surface, having at the point of departure sufficient potential to decompose the soluble chemical constituents or organic matter held in solution in this moisture. The current leaving the pipe will cause the pipe to be positive relative to the

surrounding electrolyte; this will cause an acid reaction due to the decomposition at this point.

It is not correct to assume that all corrosion is electrolysis, for the composition of the pipe may be such that a local action will be set up within the structure of metal itself. This is found to be the case with steel, where it has been rolled with particles of uncombined carbon incorporated with the metal. When the moisture of the soil rests against such a composite structure of carbon and the surrounding metal, the effect of this is to destroy or disintegrate the metal and leaves a carbonaceous substance of graphitic appearance which causes a pit of greater or less dimensions to be gradually formed on the iron surface. The test to prove whether steel for pipe construction has this peculiar composition is to submerge it in rain water, when the pitting will soon appear, if there is local action within the plate itself.

Another cause where local electrolysis may occur is where lead pipe and iron pipe are connected and buried in the same soil, the soil forming the electrolyte when charged with moisture, the lead and iron forming two battery plates.

Passing the consideration of those cases of electrolysis which are produced by foreign currents flowing from the structures, there are certain conditions that have to be understood in order to ascertain whether the structure is being deteriorated by the current; and the metal which forms the surface also determines the damage that can be done by the current under different conditions. With a given current density and potential cast iron is affected the least, wrought iron the next, mild steel the next, high carbon steel the next, and lead the next. Lead, when affected by electrolysis, shows different peculiarities from those exhibited by the iron group. The carbonate of lead is formed when carbonic acid is brought adjacent to the lead surface, which produces a low resistance path, and has the property of migrating through the soil towards the negative and receiving plate for the current, which is usually the rail. In iron, ferric oxide and ferrous oxid are formed on the surface of the iron, which of themselves are not conductors to the flow of current, but on the contrary tend to dam back or insulate the pipe on whose surface they are formed electrolytically.

“Now the principal damage to the pipe is when the pipe is positive, that is, when there is a constant flow of electricity from

the pipe to the rail. An intermittent flow of current, or when the current flows from the rail to the pipe, is not of so much consequence.

In testing the water pipe system of Weymouth, I found only two sections where the current was flowing from the pipe to the rail. These places were in North Weymouth from Thomas Corner to Quincy Point, and Washington and Lincoln Squares at Weymouth Landing. I found the conditions practically the same in both places, with a flow of current of from 3 to 10 volts. In all other parts of the system the current was found to be flowing from rail to pipe, and in my opinion there is no great damage while the current is flowing in this direction.

Now the remedy for the sections where the current is flowing from the pipe to the rail is : make a solid connection from the pipe to the rail. I would advise using No. 0 copper wire as a conductor, drill and tap the water pipe for a half inch brass plug, let the plug project from the pipe 2 or 3 inches, solder the copper wire to the plug and then rivet the other end to the rail, put these conductors about 200 feet apart as a trial. If enough of these conductors are put in, and the Street Railway Company keep their rail bonded, you will have no trouble from electrolysis. This is called the drainage system.

Now gentlemen as I understand the subject, this is a practicable and sure way of taking care of this positive current, for you are making a solid path or drain from your piping system to the return or rail. The resistance of the ground around the pipe is so great that the electricity will naturally follow the bonds which has the least resistance.

I would advise the purchasing by the town, of an ammeter and a volt meter, so that your Superintendent can occasionally make a test to find out the condition of the system.

In making the survey I was accompanied and assisted by Messrs. D. M. Easton, Commissioner and Superintendent I. M. Low.

Trusting the foregoing will meet with your approval, I am

Yours very truly,

M. A. CARTER.

During the year of 1904 it became necessary to install a new boiler at the Pumping Station ; this left another one which had

seen service for a long time. The Insurance Company has recently condemned the old one, and we have contracted for a new one, being a duplicate of the one installed in 1904, and which will be set up before the summer season opens. We then shall be equipped in a thorough manner for years to come.

The sills of the barn were found to be in very poor condition and new ones have been put in; it will have to be shingled during the coming summer.

A new 6-inch main pipe was laid in June from the intersection of Shawmut and Broad streets to Hill Crest Road, and then connected with the gravity service leading to the hydrant at the top of the hill. This main was started with the intention of supplying high pressure service to the factory of M. C. Dizer & Co., but upon their refusing to sign an agreement in writing which they made verbally, the work ceased at Hill Crest Road.

We are contemplating laying a 6-inch main along Hill Crest road as early in the Spring as conditions will permit.

It is also contemplated extending the main pipe on Main street, South Weymouth.

We regret to say that in laying the 6-inch main on Broad street, one of the workmen had his leg broken and that a suit against the town is pending for said injury.

An appropriation of \$3000 is asked for the purpose of making further constructions as may be deemed necessary for the ensuing year, also an appropriation from the revenue of the Works to be applied as follows :

Interest on Bonds	\$18,815 00
Payment to Sinking Fund	9,320 00
Superintendent's Salary	}						
Maintenance		7,300 00

Respectfully submitted,

F. H. TORREY,

Register and Collector.

SUPERINTENDENT'S REPORT.

To the Board of Water Commissioners :

GENTLEMEN : — I submit my report for the year ending December 31, 1905.

POND.

The pond has been regularly inspected during the past year and its shores have been cleaned where necessary. The usual warning notices have been posted and licenses have been granted to proper parties who have used the pond for boating and fishing. The report of the water analysis made by the State Board of Health, shows the water to be of its usual standard of purity.

New screens have been put in the gate house as recommended in last year's report. The dam on Randolph Street needs repairs.

PUMPING STATION.

The new 100 horse power boiler installed early in the year has proven satisfactory. The old boiler has been condemned by the State Inspectors, which will make it necessary that a new one be installed before summer months.

During hot weather the pumps are run to to their full capacity, which shows that a reduction in waste must be made. Many of the water takers have not a suitable pressure for domestic purposes caused by the excessive use of water for lawns and other purposes which does not benefit anybody but causes a great deal of unnecessary inconvenience to the public in general ; for this reason I wish to call the attention of the water takers to observe hose regulations.

A new connection has been made between the high and low service by means of a 10-inch by-pass and a hydraulic valve, which is operated from the station. This gives us two connections ; in case of accident to either the other would be available.

STAND PIPE.

Should be painted on the inside; this should be done every year to prevent the erosion of the iron.

MAINS.

The mains have been regularly flushed. The laying of a high service 6-inch main on Broad street, connecting Shawmut street and Hillcrest road is the only extension larger than 2-inch.

I have to report one leak in hydrant joint on Washington street near Federal avenue.

HYDRANTS.

The hydrants have received the usual attention.

GATES.

The gates have been inspected and are in good working order.

ELECTROLYSIS.

As recommended in the report of last year an examination into the electrolic condition of our pipes has been made. The report of M. A. Carter, Superintendent of Electric Light and Power Company, who conducted this investigation, will be found in full elsewhere.

SERVICE PIPES.

Forty-three frozen service pipes have been thawed out and thirty-seven leaks have been repaired during the year. Seventy-nine new service pipes have been laid and seventy-two old service pipes have been relaid as follows:

4	$\frac{3}{4}$ -inch lead	123.0	feet
92	$\frac{3}{4}$ -inch lead lined	2334.9	"
10	1-inch lead lined	304.5	"
1	2-inch lead lined	33.0	"
41	$\frac{1}{4}$ -inch galvanized iron	576.2	"
2	1-inch galvanized iron	28.6	"
1	1 $\frac{1}{2}$ -inch galvanized iron	16.0	"
								3416.2	feet
Number of feet of service pipe relaid								1652.9	"
Number of feet of new service pipe laid								1763.3	feet

Two thousand eight hundred and sixty-nine service pipes have been laid to date; of these there are fifteen that have not been let on and twenty-three that have been discontinued.

Number of feet of each size laid as follows :

2510	$\frac{3}{4}$ -inch diameter	57,903.5 feet
273	1-inch diameter	7,663.8 "
5	$1\frac{1}{4}$ -inch diameter	105.3 "
25	$1\frac{1}{2}$ -inch diameter	1,010.0 "
43	2-inch diameter	972.5 "
1	$2\frac{1}{2}$ -inch diameter	17.0 "
2	3-inch diameter	44.1 "
6	4-inch diameter	136.0 "
4	6-inch diameter	107.1 "

Total length of service pipe	67,959.3 "
------------------------------	---	---	---	---	---	------------

Number of miles of service pipe 12,871.

Seventy one water-takers have been added this year, making total number to date three thousand.

Thirty-seven services are shut off temporarily on account of vacancy and fifteen are shut off for non-payment of rates.

Water is supplied to the following :

ENGINEER'S REPORT.

January 1, 1906.

To the Board of Water Commissioners and Superintendent of Water Works:

GENTLEMEN:—I herewith submit my report for year just ended.

I have continued the practice of getting right after repairs as soon as required, and will say that everything about Pumping Station is in fairly good condition, with exception of old boiler.

The new boiler which was installed the latter part of the year of 1904, and was started for the first time on January 25th, 1905, and after same was thoroughly tested and slight leaks made tight, was put on regular work, and has proved a very good boiler for the Station, handling the whole plant during the summer when Station was running at its fullest capacity at different times; and, though plenty large for one pump, is a good boiler for the future, and on examining the following records of the performance of both engines, you will note a gain in economy (that is, gallons of water pumped per lb. of coal, on total coal used during the year) and most of the work was done with new boiler. I have changed all pipes and fittings leading from boiler-feed pumps to hot-well, to brass pipe and brass fittings, instead of iron, as same was considerably corroded.

Other changes and repairs to piping, valves and pumping apparatus were made as soon as they were required.

The new Hydraulic Valve recently installed is working very satisfactorily, and is of great help when changing from high service pumping to low service pumping, with engines running, which I have to do several times in the day during the summer months.

From my data of measurements which I have taken at Great Pond, I find that pond was at its highest point on, or about, April 13th, it being on this date two inches above what is called high water, and at its lowest point on, or about November 24th, it being on that date fifty-three inches below high water.

Yours Respectfully,

C. B. KLINGEMANN,

Engineer.

ANNUAL REPORT
OF THE
SCHOOL COMMITTEE
OF THE
TOWN OF WEYMOUTH
1905.

WEYMOUTH MASS.:
GAEZETTE PUBLISHING COMPANY,
1906.

REPORT OF THE SCHOOL COMMITTEE.

SCHOOL COMMITTEE.

	Term Expires.
William A. Drake, Chairman	March, 1906
F. E. Loud, Secretary	March, 1906
H. F. Perry	March, 1907
Charles H. Willoby	March, 1907
Mary F. Holbrook	March, 1908
J. A. Cushing	March, 1908

STANDING COMMITTEES.

Text-books.—Mrs. Holbrook, Messrs. Drake, Willoby.

Supplies.—Messrs. Loud, Cushing, Drake.

Teachers.—Messrs. Perry Drake and Mrs. Holbrook.

Fuel.—Messrs. Cushing, Perry.

Repairs.—Messrs. Cushing, Willoby.

Finance.—Mrs. Holbrook, Willoby.

Regular meetings of the Committee are held the first Tuesday in each month at the Water Commissioners' Room, East Weymouth.

SUPERINTENDENT.

Abner A. Badger, 786 Commercial street, East Weymouth, Mass. Office hours: Monday at close of school, Athens. Tuesday at close of school, Jefferson. Wednesday at close of school, Howe. Thursday at close of school, Hunt. Monday, Tuesday, Friday, 4.30 to 5.30 at home.

SCHOOL CALENDAR.

Winter term begins January 1, 1906, ends March 23, 1906, 12 weeks. Spring term begins April 2, 1906, ends June 22, 1906, 12 weeks. Fall term begins September 4, 1906, ends December 21, 1906, 16 weeks. Winter term begins December 31, 1906, ends March 22, 1907, 12 weeks.

HOLIDAYS.

Washington's Birthday, Patriots' Day, Memorial Day, Labor Day, Thanksgiving Day and Friday following.

NO SCHOOL SIGNAL 2-2.2.

At 7.30 a. m. no school in any grade during the a. m. At 8 a. m. no school in grades I and II. At 11.45 a. m. no school in grades I and II during the p. m. At 12.45 p. m. no school in any grade during the p. m.

To the citizens of Weymouth :

Your School Committee has the honor to submit herewith its annual report, together with the report of the Superintendent of Schools and the appended statistics.

The first of April we were again confronted with the resignation of the Superintendent of Schools. Mr. John C. Anthony, after a service of only four months, which promised to be of exceptional value to our schools, tendered his resignation, in order to accept a position paying a much larger salary than Weymouth could consider. Mr. Anthony closed his labors here May 1st. After an extended canvass and numerous interviews with candidates we were of a unanimous opinion that in order to obtain a capable and efficient Superintendent of Schools who would stay with us a reasonable time, a salary averaging, at least, that which other towns in this state were paying would have to be provided. With our experience of five changes in the office of school superintendent within as many years, we think that the town should be congratulated on having a corps of teachers which has the ability to carry on the work and maintain the standing of our schools as well as it has.

A vote was passed fixing the salary at \$1,800 per annum. We wish to further emphasize the fact that even at this figure we are several hundred dollars below that which the position demands and other places similar to Weymouth are paying their Superintendents.

Mr. Abner A. Badger was elected to fill the vacancy in April and entered upon the duties of the office the first of May. At the present writing we are of the opinion that once again we have an efficient head to our school system and that progress will be maintained toward that perfection which it is our aim to steadily approach.

Mr. Badger received special training for his profession in the

Farmington State Normal School from which he is a graduate. He is also a graduate from Bowdoin College. He has a record of success as a teacher and has been Superintendent of schools in Skowhegan, Me., and for several years has held a similar position in Walpole and Medfield, from which he resigned to accept the superintendency of Weymouth. While we may have made a fortunate selection, we are constantly menaced with the danger that a smaller salary than the place demands may at any time deprive us of his services.

The number of teachers who have resigned, below the High School, to accept more lucrative positions has been about the average for several years. While the salaries of the teachers below the High School are not as large as they average in the state, for towns and cities about the size of Weymouth, fortunately your Committee has not been hampered in obtaining competent teachers for these positions.

All the teachers in the High School should receive more compensation in order to enable us to retain our valuable instructors, and therefore compete more efficiently with the schools in our class. There are no positions in town where frequent changes in our teaching forces are so detrimental to good results, or so far reaching in their ill effects as the High School. The aim of your Committee will be to get the best for the money in every instance.

At present we have an enthusiastic, hard working and loyal corps of teachers which, with very few exceptions, it would be unfortunate to lose.

The High School was never in a better condition, the work done there receives the hearty commendation of those who have visited the school with the object of studying the methods and results. During the coming year it may be possible with the advice of the Principal and Superintendent to improve and strengthen the weak places and make this school still more worthy of the pride and support of our citizens.

It is our pleasure to record an increasing interest, on the part of our citizens, in school room and school ground decoration. We learn that the public school association has decided to make a beginning the ensuing year in this line of work. An attempt was made over two decades ago to improve the yards by planting flowers and shrubs where it would not interfere with the play

grounds, and the results, in some cases, were gratifying. The work was done under the direction and co-operation of the school committee and the improvement associations and in a few instances by private contributions.

The association is having plans of the high school grounds drawn by a landscape gardener which will be submitted to your committee for approval. This line of work is commendable and no doubt something will be done to improve and beautify this lot. The hearty cooperation of the school committee is tendered. Among these evidences of interest in this question none were more gratifying, than the decision of the members of the disbanded young mens Christian Association to make the high school the beneficiary of its surplus fund, amounting to nearly three hundred dollars. A special committee has made a very judicious expenditure of this money, and, as a result, there have been added to the decorations of the assembly hall three large pictures and six pieces of statuary, which will serve as a source of enjoyment and inspiration, and a constant reminder of the generosity of the donors.

A marked improvement in music and drawing, during the year is noticeable. Possibly no single study has shown such satisfactory results as drawing. Under the instruction of Miss Hackett, whom we regret to learn has accepted a position, in the Boston schools, paying a much larger salary than we felt justified in considering. It would not only be a satisfaction to the committee and teachers but of profit and pleasure to our citizens if there was a more general attendance upon the frequent exhibitions of drawing in the several schools and a study of the results obtained.

Owing to the increase in the number of pupils in East Weymouth it became necessary to open another school in the small room in the Franklin Building. This additional expense was not contemplated at the beginning of the year, but will have to be considered as a permanent school in the future, as every room in this ward is crowded and a careful estimate of those who will enter another year make it probable that still another school will have to be provided for next September. The same ratio of increase for two years more will bring before you the question of a new building for this part of the town. Various propositions for enlarging some of the buildings now in use have been considered by members of the Committee, but that which would be most

desirable would be a new twelve room building to take the place of the Franklin and Bicknell school houses.

The reconstruction of the interior of the Howe School Building was carried out under the direction of a Special Committee consisting of Messrs. Loud and Cushing, with the Superintendent of schools. The plans were drawn by an architect and submitted to the State Police for approval. Work was commenced immediately after the close of the school year in June.

The two north rooms were much too small and the heating very unsatisfactory.

The new plan takes the hall from the front of the building, allowing nearly all that space to be added to the small rooms. The plans necessitated the tearing out of the old partitions and the construction of a large amount of new work. One heavy portable furnace was added to heat the halls and to augment the heating of the north rooms. The results have been very satisfactory. A new hard pine floor was laid in one room and a sufficient amount of slate black boards added for the entire building. Modern hat and coat racks have been fitted up in the halls and a toilet room for the teachers provided. All of the interior, including the walls, ceilings, desks and seats have been painted or varnished. The proper lighting of the room required a change in several windows and the addition of new ones. The appropriation asked for by the Committee was \$1,500.00 for these repairs and changes. In excess of that amount we have expended \$95.00, made necessary in order to conform to the requirements of the State Inspectors, which could not be anticipated at the commencement of the year.

The usual amount of repairing has been done the past year. We repeat, from year to year that owing to an insufficient amount of money we have been obliged to adopt a policy in repairing the old buildings that is not for the best interests of the town. In many instances it has been a system of patching rather than repairing. For a more detailed statement, under this head we refer you to the itemized report of the town accountant.

Owing to the increase in the number of pupils in the Franklin building quite a number of new seats and desks had to be provided and as the seats and desks in one room were very poor it was decided to newly furnish the room; as this bill amounting to

\$150 has not been rendered or paid, it will not appear in the report this year.

The question of school supplies has always been one that has caused the school officials as much if not more study than any other. While our account exceeds our estimate we feel that every expenditure has been for a necessity and that a much larger amount could have been judiciously expended, and we recommend that you consider once again the question of allowing all school children the exclusive care and custody of permanent supplies. It may be proper to remind you that this question has heretofore been disapproved by the voters in town meeting. In these days of intelligent effort for the suppression of contagious disease ought we not to cheerfully bear the additional expense of removing this constant menace to health in our schools.

The manual training work in wards four and five, of which a detailed account was given in our last annual report, has been carried on under the same management as that of last year. More of the citizens have become interested, among the number The Stetson Shoe Co., which has contributed \$100 for the support of the work, believing it to be a good business investment. Mr. Moore has continued as the instructor of the classes at the Fogg Library. At the Pratt School there have been two changes. In July Mr. Wessborg resigned to accept a much better position in Michigan. Mr. Charles A. Smith began the work in September but resigned in October to accept a similar position in Albany, N. Y.; Miss Pearl C. Blair was engaged to fill the vacancy. At the Pratt, both the boys and girls in the 5th, 6th and 7th grades receive the instruction, but at the Fogg Library only the boys from the 7th, 8th and 9th grades are taught, while the girls receive instruction in sewing under the direction of Miss Rockwood.

The educational value of manual training or industrial work is too well known to require discussion here. Your committee heartily endorses the work being done at South Weymouth and wishes funds were available for carrying on the work in all the schools.

The expenditures for support of schools during the year are as follows :

Instructors	\$33,671 29
Janitors	3,678 80
Fuel	4,538 87
Repairs	{	Includes remodelling Howe School House \$1,595.75				4,946 44
Incidentals	276 80
Supplies	4,904 40

Respectfully submitted,

W. A. DRAKE,
F. E. LOUD,
J. A. CUSHING,
H. F. PERRY,
MARY E. HOLBROOK,
School Committee.

REPORT OF THE SUPERINTENDENT OF SCHOOLS.

To the School Committee of Weymouth :

I have the honor to submit the annual report of the Superintendent of Schools the twentieth in the series.

This report is necessarily brief as my knowledge does not extend over the whole of the year, having begun my duties here in May. My predecessor was here hardly long enough to get a general idea of the situation yet his work was so well done and his plans were so well outlined that I have been able to accomplish more in these few months than would have been possible otherwise.

In a town covering as much territory as Weymouth does it is a difficult task to become thoroughly in touch with every phase of the work in the short space of one year, even, so I may not have the correct solution of all the educational ills that confront Weymouth. From my observation, however, it seems to me that the conditions were never any better for securing satisfactory results. It is very natural that a town composed of several villages should sometimes during its history develop more or less of the sectional feeling, but I am very glad to say that Weymouth seems disposed to look for the good of the greatest number. This is as it should be. Not South Weymouth, or North Weymouth, or East Weymouth but *Weymouth* should be the slogan now and for all time. This spirit will soon place the town where she ought to stand, not only educationally but morally and ethically. It seems to me that no one thing has contributed to this state of things more than the Central High School, located in a beautiful building situated in what will be, in a few years, the center of the population. The centralizing of the high school did more for the cause of education here in Weymouth than everything else that has been done during the last twenty-five years.

The greatest harmony and good will exists between the pupils and teachers which is very essential for good healthy constructive work. The whole end and aim of the public schools is to develop better boys and girls, better men and women, better citizens, therefore it is of the utmost importance that the teachers should be men and women of the highest types of manhood and womanhood. There is no more sacred profession than teaching ; how essential then that the teacher should be a strong, robust, healthy, inspiring person full of sympathy and with the highest ideals. As the teacher so the school and as the school so the nation, is a very true saying.

The regular school work has had very few interruptions and that at the beginning of the year due to the cold stormy weather. The Weymouth Fair having been held this year before the opening of the schools in September did more to improve the school work of the fall term than most people realize.

TEACHERS.

The usual number of changes in the teaching force has occurred during the year and two teachers have been added to the corps so that sixty-four teachers are now employed. The corps as a whole is very much stronger than it was one year ago and we trust that another year may see a greater gain in that direction. Every child in town has a right to the best instruction possible and it is our business to see that he has it. Each year of service should add to the efficiency of every teacher and only such teachers should be retained in the service of any town. Where there is growth there is life.

The way to get the best value from teachers is by giving them opportunity and appreciation. The town or city that does the most for its teachers is the one which has the best schools. More people have failed in this world from lack of appreciation than of any one thing. Every teacher worthy the name ought to be given one year off in every seven for study, rest and travel. Any town adopting such a plan would be able to retain good teachers much longer in its service and the efficiency of the schools would be increased thereby a hundred fold.

SALARIES OF TEACHERS.

If the town expects to retain the best teachers possible, long in its employ then it must increase the salaries. The town may feel that it is not in a financial condition that would warrant such action, but can it afford not to do so? I think it is not a question of dollars and cents but what is best for the boys and girls, what is best for the schools. I would recommend that the following salary schedule be adopted to go into effect next September :

High School Principal a minimum salary of \$1,400, with a maximum of \$1,800. Submaster, a minimum salary of \$800, with a maximum of \$1,000. Science, a minimum salary of \$800, with a maximum of \$1,000. Assistants, a minimum salary of \$600, with a maximum of \$800. Grammar School Principals, a minimum salary of \$900, with a maximum of \$1,000. Grades one to eight inclusive, a minimum salary of \$400, with a maximum of \$550.

The adoption of such a schedule would do more to improve the schools of Weymouth than any other one thing that could be done.

THE SCHOOL SYSTEM.

It seems to me that a saving of time and money could be secured if the whole school system were made a twelve instead of a thirteen years course. By making the kindergarten a part of the system, by allowing the child to enter the first grade only after he or she had reached the age of six years, and by cutting out the ninth grade the change could be easily brought about. I would do away with the grammar school graduation and diploma and so help the pupils and parents feel that there was no break or stopping place till the end of the High School course is reached. This plan would mean a great saving of money for the town as well as for the pupils. It would also give that time for growth and development that is now spent in the ninth grade in the preparation for graduation, and bring more pupils into the High School thus increasing the efficiency of the citizens.

I think that most of the towns and cities in the state have only eight years below the High School whether they have the kindergarten or not. I have suggested the kindergarten as it is in line with the best educational thought of the day. If it is not possible to have that adjunct at present let us make the change to

eight grades below the High School and then prefix the kindergarten when there is a demand for it on the part of the citizens.

COURSE OF STUDY.

At the close of the schools in June the teachers expressed a wish for a new "course of study" I felt the need should be supplied if we were to accomplish the best results. So after much deliberation and study during the summer vacation, a "course" was planned. Typewritten copies of this were placed in the hands of every teacher at the first teachers' meeting held in September. This "course" is being followed as closely as it is consistent for the good of the school. The best interest of the pupil is the thing sought. Changes are being made from time to time as the conditions and ability of the pupils require so that at the end of this school year we ought to have a "course of study" well adapted to the needs of the Weymouth Schools. This should be printed during the summer together with the revised "course" for the high school.

TEXT BOOKS.

Owing to the worn out and soiled condition of many of the textbooks we have been obliged to have many new books. Exchanges have been made in language books, spelling books and arithmetics so that in these three branches we have new books.

Quite a number of new reading books have been purchased and many more will be needed next year if we expect to make our pupils good intelligent readers.

Algebra is being studied in the ninth grade this year for the first time which will tend to help the pupils to secure a better understanding of their arithmetic and also save them much valuable time after they reach the high school.

In the use of supplies we are practising economy in every way possible so that I think we can reduce our expenditures in that direction a good deal another year.

The teachers are making every effort to keep the textbooks in a clean wholesome condition. To assist in this work each school has been supplied with paper towels and soap so that the pupils may have clean hands and faces while in the school rooms. There is one other thing that might be done to keep the books clean and that is to purchase the Holden Book Covers for all the

pupils' books and then at the end of each year the old cover can be replaced with a new one. These covers cost about two cents each and I think they save more than that in the increased service of the book.

MUSIC.

Music is one of the branches of the school work that is often neglected because so many of us fail to see the importance attached thereto. What use will it ever do to my boy or girl is the question so often asked. It does more to promote happiness and bring out the best there is in us than any other study. Too many children have been excused from singing here in Weymouth for the past six or eight years for us to be securing satisfactory results. Every one is supposed to sing now and we predict that with the adoption of the Weaver System of instruction a great gain will be made in this important study. The underlying principal of the Weaver System is individual independence in sight singing. Instruction in staff notation with individual sight reading is begun in the first grade and continued until the child reaches the high school. While individual series is introduced only as fast as grades are ready for it, individual work is constantly going on, so that the pupil soon becomes as accustomed to sing alone as to read alone, and in many cases considers it a special privilege. Special attention is given to rote songs and the greatest care is taken that the child is kept alive to the aesthetic as well as to the technical side of the music. This system is being used in one or two of the grades this year and next year I trust that it will be made the basic principle of all the work in music.

There is plenty of material in our high school to develop a first class chorus, glee club, and orchestra which would not only be a delight and an inspiration to the students there, but it would inspire the boys and the girls in the grades to do their best, so that when they become members of the high school they might secure a place in the glee club or orchestra.

The report of the supervisor, Mr. Sidelinger, will be found in the appendix which will bear your careful reading.

DRAWING.

Drawing is one of the most important branches of the school curriculum and Weymouth has good reason to be proud of the

work being done by the pupils of the public schools. In the public contests this year our pupils have had their share of awards. It is with deep regret on the part of all concerned that Miss Hackett, who has had charge of the drawing for the past two years, has decided to accept a more lucrative position elsewhere. What is Weymouth's loss is Boston's gain. It has been due to Miss Hackett's personality and inspiration that the pupils and regular teachers have been able to accomplish such splendid work. For a more detailed account of this subject I refer you to the report of the supervisor which is found in the appendix.

I trust that the day is not far distant when all the children of Weymouth may receive instruction in some form of Industrial Work, of which drawing is the foundation, and thus this line of development be carried to completion.

Weaving, rafia work, basketry, sewing, bench work, and gardening are as essential to the all round development of our boys and girls as geography and arithmetic. I am very glad the children in wards four and five are receiving instruction along some of these lines at the present time. Our heartiest thanks are due those parties who are making it possible for this work to be carried on in those schools there.

HIGH SCHOOL.

The town has a right to be proud of its High School and the work being done there. The school is in a very satisfactory condition and with two or three changes in the curriculum excellent results can be secured and boys and girls may be as well fitted for college or for life work as any where in the state. I think that more time should be given to the study of English and that more studies be required each year leaving fewer elective studies. If the Commercial Course is to serve the best interests of the town the old Manhattan typewriters in use there should be exchanged for some modern machines.

The old machines are giving much trouble and thus interfering with the efficiency of the work. The High School is the people's college and should be made to serve the interests of all rather than the few who go to college, hence the "course of study" should be a general one with enough electives to enable the boy and girl going to college to secure the best fit possible. With the few changes suggested we shall have such a "course."

For a more comprehensive account of the conduct of the school during the past year you are referred to the report of the Principal, Mr. Sampson.

SCHOOL ROOM DECORATION.

Most of our school rooms are destitute of good pictures and those things that go to make the place look cheerful and attractive. For the purpose of developing a greater public interest in school room decoration and art and incidentally to secure pictures and statuary for the decoration of the school rooms, the Horace K. Turner Art Exhibit will be held, in the High School Hall, May 16-19 under the auspices of the Weymouth Public Schools.

The High School has received from the late Y. M. C. A. about \$400 worth of pictures and statuary for the decoration of the Assembly Hall which is an excellent addition to the work already begun. A plan has been made for the complete artistic decoration of the whole building so whatever is done in the future may be done in harmony with what is to follow. Any one wishing to give pictures or statuary may be assisted in deciding what to give by consulting this plan.

The town is unfortunate in having so many small school houses when six or seven large ones would serve the purposes so much better in every way. If there were, besides the high school, one large building in each ward so much better results might be secured and at the same time it would be a great financial saving to the town. While that is the ideal and not to be realized for many years perhaps, yet we should work with that in view and in the mean time make the present conditions as nearly ideal as possible. Only three or four of the present buildings are properly lighted or ventilated nor are they supplied with suitable toilet rooms. All these things are a menace to the moral and physical well being of the child. They tend to tear down faster than we can build up in the moral and ethical world of the pupils. So much depends upon the surroundings and environment of the child whether at school or at home,

Without doubt, more school room will be required next September, in ward two. There is no available room and a new building or addition to one of the old ones is the only solution of the problem if the children are to have suitable conditions for their proper growth and development. The Jefferson can be

easily changed into a six room building but that will not relieve the crowded condition at the Washington where the congestion is the greatest.

It seems best for the present as well as for the future that an eight or a twelve room building be erected where the Franklin now stands or in that vicinity, and then the fifth grades from the Jefferson and Washington also the sixth grades in the Bicknell could all be accommodated in the new building and the Bicknell house and lot sold. This would be a step towards the ideal and in the following years, as soon as possible, the Bates and Hunt should be replaced with modern ten or twelve room buildings and the other buildings in those wards disposed of. If some such plan could be adopted and every one in town work for it the whole thing might be accomplished in a few years without a great burden resting on any one.

I also recommend that the River School be closed, the children transported to the Athens and the old house and lot sold.

I would also recommend that the Pratt and Holbrook schools be closed and the children transported to Ward Five, if the new building there, mentioned above, could be built at once. This is exceedingly necessary if those pupils are to receive the best education possible. If this plan cannot be carried out then the next best thing would be to build a four room building near Lovell's Corner, which would provide for eight grades with two grades to a room.

As the grades would be very small for some time, probably, the conditions would be very favorable for good results. Much better than at present, to say the least.

We must not expect any teacher to do her best work unless we give her the best conditions possible to work under. Now no teacher can secure the best results when she has more than thirty-six pupils in a poorly lighted and poorly ventilated room and it is especially true when those thirty-six pupils are composed of more than two grades.

JANITORS.

There is no more important phase of the school work than that of the Janitor's service. To keep the school rooms in a properly heated condition, well swept and dusted is no small task. As a whole our Janitors work hard and faithfully in the performance of

their duties and as a result most of the rooms have been kept in splendid shape. Only in one or two instances has the work been so poorly done that the matter has been called to my notice. Many compliments have reached me in regard to the splendid care at the High School, Athens and Washington, and I think that you will always find those buildings ready for inspection.

THE PUBLIC SCHOOL ASSOCIATION.

I am very glad that this town can boast of a Public School Association. It is something that every town ought to have, about which all the forces in the town might rally to support every cause that tends to promote better schools and a better civic pride. This Association is now giving its attention to assisting the School Committee in making our school yards more artistic and beautiful. Every citizen in town should become a member of this Association and help push the good work along. In union there is strength. Medical inspection of the schools by means of a physician or residence nurse is a good problem for this Association to solve and make practical for Weymouth. This would save much sickness and prevent the spread of any disease so that there would never arise the necessity of closing a school on account of contagion.

CONCLUSION.

In conclusion I wish to thank the citizens for their interest shown in the welfare of the schools, the teachers for their hearty co-operation, and the School Committee for its loyal and unanimous support.

Respectfully submitted,

ABNER A. BADGER.

East Weymouth, Massachusetts, December 31, 1905.

APPENDIX.

WEYMOUTH, Dec. 31, 1905.

To the Superintendent and School Committee:

I herewith submit to you a report of the conduct of the High School for the past year, the same being my second as Principal.

From the time of my last report to the close of the school year the routine work was continued without noteworthy incident. On June 22 a class of thirty-nine pupils was graduated. At the present writing most of these have found employment in store or office or are pursuing their studies elsewhere, representatives of the class being enrolled at Dartmouth, Amherst, Tufts, Boston University, Mount Holyoke, Mass. Institute of Technology, Bridgewater Normal School and the various business colleges in Boston.

The registration during the present year has reached 236, divided as follows: Seniors, 46, Juniors 46, Sophomores 53, Freshmen 91.

The present Freshman class seems to possess much better staying powers than did its predecessor as 83 of the 91 who entered in September are still enrolled and two, who were obliged to leave, are intending to re-enter next Sept.

If all the seniors at present enrolled maintain the required standard in scholarship, the class which graduates in June will be, I think, the largest in the history of the school.

With the graduation of this class the study of Greek will pass from the school. Personally, I regret to see this as the classical course is, it seems to me, a valuable one both for disciplinary purposes and as a medium for entrance to college. The demands of the college increase so considerably that it is becoming difficult, under a widely elective system, to furnish the modern language equivalent without doing an injustice to the far greater number who desire a more varied course.

I wish to call the attention of the parents to the tendency on the part of pupils under an elective system to choose a course

requiring the minimum of effort, to the detriment of their mental development.

In this connection I quote a few lines from a recent report of the State Board of Education :

“ It is generally agreed that a well ordered elective system in college is desirable but if it is to be extended to the high school it should be carefully guarded. It is liable to become the means of avoiding education rather than obtaining it.

“The beginnings of all subjects are easy. It should never be possible for a pupil to drop a study before he has met and struggled with its difficulties.

“No pupil should be deprived of the opportunity to secure that toughness of mental fibre which is the result of prolonged and strenuous effort.”

If I seem to pupils and parents to be unjust in this matter it is because I believe that the above is sound doctrine.

There were but two changes in teachers during the vacation, and as the school suffered no disadvantage in either case and as an additional teacher was furnished this year, the school runs more smoothly and efficiently than at the corresponding time last year.

The community seems to be manifesting a lively interest in our school room environment just at present and pupils and teachers are grateful for the recent donations which have been made and for the prospects of the gradual filling out of a systematic plan for school room decoration and the improvement of the grounds about the building. The members of the recently disbanded Young Men's Christian Association deserve especial mention for their gift of pictures and statuary which now adorn our assembly hall.

In concluding this report, I desire to thank the citizens for their confidence, the pupils for their co-operation, the teachers for their loyalty and willingness and the superintendent and committee for the hearty support accorded me on all occasions.

Respectfully submitted,

EDWIN R. SAMPSON,

Principal.

Mr. A. A. Badger, Superintendent of Schools :

DEAR SIR: In compliance with your request I submit my report for the year 1905, as director of music of the schools of Weymouth.

It is our aim to secure for the boys and girls in our school three things :

1. A love and appreciation of good music.
2. A sweet, natural voice.
3. The ability to read music.

This should be begun and carried on in the elementary grades. A systematized plan for the development of the child's voice is given to each teacher, and good results are more apparent when teachers follow the plan.

We feel that it is not too much to say that all of these results are secured in a large measure. I think it must be observed by all who are in close contact with our schools that the children are learning to read music very readily. This is the verdict of those who watch our children in the schools as well as of those who prepare them for any public singing.

With this ability to sing, great care must be exercised in training and developing the voices. Our method of voice building is of such a nature that it can be put into practice with the every day drill. Children have very small yet very sweet singing voices if used as nature intended they should be.

This year more time is being given to individual singing. We have introduced the Weaver slips, each pupil from the 2nd to the 6th grade is required to stand and sing a short exercise alone. This has not been tried long enough as yet to report results.

While I believe in individual singing I think more time should be given to oral and written dictation and melody writing, this also answers the purpose of reaching the individual. Previous to this year a plan or outline for the lesson was given out for the entire year. This year, lessons are planned two months in advance, giving each class a chance to advance according to its ability.

The work in the High School this year is nearly up to the standard. While the boys' voices are not quite as strong as in previous years, yet we feel sure that they will develop very fast with good practice.

The High School furnished a mixed chorus of 40 voices to sing for the Grand Army on Memorial Day ; their singing was highly commended by several of our leading musicians.

We have a Glee Club of 70 volunteers who are studying Lahee's Cantata, The Building of the Ship.

There are many things that might be said, but time and space will not permit.

In closing I wish to heartily thank the Superintendent, School Committee, and the faithful teachers for their united support.

Respectfully submitted,

A. J. SIDELINGER,

Supervisor of Music.

Mr. Abner A. Badger,

Superintendent of Schools :

Herewith is presented the annual report of the work in drawing in the Weymouth schools for the year 1905.

The time given to the different departments of the work has been as follows :

September, October, November — Nature drawing and painting, the study of autumn flowers, fruits and vegetables, the study of trees and landscape composition.

December, January, February — Constructive drawing, including measurements, geometric figures, working drawing, printing, and constructive design applied to practical objects.

March, April — Object drawing for the study of foreshortening and perspective principles ; animal drawing and pose drawing for the study of action and proportion.

May, June — Design from abstract units for the study of principles of rhythm, balance and harmony ; drawing and painting of Spring flowers and their application to designs of practical objects.

The many different departments of the course in drawing help to make it of general benefit to every pupil as a means of culture. We do not try to educate artists only, but those who shall be trained to know that "Art consists in doing each right thing well", who can execute neatly, observe carefully, who have good taste, a desire for the beautiful, and the ability to represent it and to make beautiful objects.

In June, 1905, an exhibition of the work of grades one to nine was given in Tufts library, Weymouth, and an exhibit of the High school work was given at the time of graduation.

The present encouraging condition of the drawing in the Weymouth schools is due to the excellence of the Weymouth teachers, and the kindness and co-operation of Superintendent, School Committee, and Citizens. I wish to express appreciation of this helpfulness, and to thank teachers and pupils for their valuable assistance and earnest and faithful work.

Respectfully,

GRACE E. HACKETT.

Bessie Ahern Donovan	Arthur Edson Burrell
Annie Halloran	John Joseph Condric
Catherine Theresa Liberty	James Francis Condric
Lillian Palmer Loud	Frederick Jaeger
Nellie Elizabeth Powers	La Forrest Webster Lincoln
Roy Chessman Stetson	

CLASS ODE.

Words by Martha A Donovan

Tune, "Fair Harvard"

As time, fleet of foot, has hurried us on
 To the point where our ways must divide,
 And the world waits to greet us with ready embrace
 To be borne on by life's restless tide,
 We fondly recall the bright happy hours
 That once filled our hearts with their joy,
 And though ended in deed, rich mem'ries will cling,
 Which e'en time cannot wholly destroy.

Though only light tasks have as yet been our lot,
 And our lives have been free from all care,
 Life's sorrows as well as its joys come to all,
 And each in his neighbor's should share.
 Let us not be content with a low aim in life,
 But remember the motto we chose,
 That in truth it is labor that conquers all things,
 Knowing Victory's palm harbors foes.

As we stand at the portal awaiting the call
 That will usher us on to life's field,
 Where each has his work to do, lowly or great,
 Whatever the future doth yield,
 With trust in our God, to ourselves ever true,
 We will aim for the noblest and best,
 And work not for wealth alone, pleasure or fame,
 But strive—to be worthily blest.

HONOR LIST.

Marion Alice Hoyt.

RECEPTION OF GRADUATES, CLASS OF 1905.

High School Building, Weymouth Center, Thursday Evening, June 22.
 At 7 45 o'clock.
